A. Internal Risks and Risks Associated with our Business

1. Our business has been growing consistently in the past. Any inability to maintain our growth may have a material adverse effect on our business, results of operations and financial condition.

We have experienced consistent growth in the past. As at September 30, 2016 and as at March 31, 2016, our total gross outstanding loans advanced stood at ₹ 7,90,455.60 lakhs and ₹ 6,75,263.69 lakhs, respectively.

For the half year ended September 30, 2016 and the fiscal years ended March 31, 2016, 2015 and 2014, our revenue from operations was ₹ 48,914.43 lakhs, ₹ 79,603.97 lakhs, ₹ 50,094.93 lakhs and ₹ 42,282.48 lakhs, respectively, and our profit after tax was ₹ 4,184.68 lakhs, ₹ 8,675.69 lakhs, ₹ 6,906.32 lakhs and ₹ 4,338.90 lakhs, respectively. The Company’s revenue from operations and profit after tax grew at a CAGR of 23.48% and 25.98%, respectively, during the three fiscal years ended March 31, 2016.

Our growth strategy includes increasing the number of loans we extend, diversifying our product portfolio and expanding our customer base. There can be no assurance that our growth strategy will continue to be successful or that we will be able to continue to expand further or diversify our product portfolio.

Our growth exposes us to a wide range of increased risks within India, including business risks, operational risks, fraud risks, regulatory and legal risks and the possibility that the quality of our AUM may decline. Our results of operations depend on a number of internal and external factors, including the increase in demand for housing loans in India, competition, our ability to expand geographically and diversify our product offerings and also significantly on our net interest income.

In order to maintain our growth in the future, we will, inter alia, need to continue to focus on: (i) raising funds at optimum costs; (ii) our managerial, technical and operational capabilities; (iii) the allocation of our resources; and (iv) our information and risk management systems. In addition, we may be required to manage relationships with a greater number of customers, third party agents, lenders and other parties.

Our business depends significantly on our marketing initiatives. Our sales and marketing efforts are mainly conducted by third party social media marketing providers. Our marketing expenses amounted to ₹ 805.00 lakhs, ₹ 1,365.65 lakhs, ₹ 1,177.83 lakhs and ₹ 1,200.78 lakhs in the half year ended September 30, 2016, fiscal years ended March 31, 2016, 2015 and 2014, respectively. Our business sourcing expenses (including DSA commission) amounted to ₹ 571.29 lakhs, ₹ 1,060.27 lakhs, ₹ 726.77 lakhs and ₹ 641.65 lakhs, respectively, for the same periods. If we fail to supervise and control the sales and marketing activities of such third party service providers, the quality of our marketing initiatives may deteriorate. There can be no assurance in relation to the impact of such initiatives and any failure to achieve the desired results may negatively impact the Company’s ability to leverage its brand value. Further, there can be no assurance that we would be able to continue such initiatives in the future in a similar manner and on commercially viable terms.

Further, we cannot assure you that we will not experience issues such as capital constraints, difficulties in expanding our existing business and operations, and hiring and training of new personnel in order to manage and operate our expanded business. Any or a combination of some or all of the above-mentioned factors may result in a failure to maintain the growth of our loan portfolio which may in turn have a material adverse effect on our business, results of operations and financial condition.

2. *Our business is particularly vulnerable to volatility in interest rates.*

A significant component of our income is the interest income that we receive from the loans we disburse. Our interest income and profitability directly depend on the difference between the average interest rate at which we lend and the average interest rate at which we borrow. Interest rates are highly volatile due to many factors beyond our control, including the monetary policies of the RBI, deregulation of the financial sector in India, and domestic and international economic and political conditions. These factors could affect the interest rates charged on interest-earning assets differently than the interest rates paid on interest bearing liabilities

If there is an increase in the interest rates that we pay on our borrowings, which we are unable to pass on to our customers, we may find it difficult to compete with our competitors, who may have access to funds sourced at a lower cost. Further, to the extent our borrowings are linked to market interest rates, we may have to pay interest at a higher rate than lenders that borrow only at fixed interest rates. Fluctuations in interest rates may also adversely affect our treasury operations. If there is a sudden or sharp rise in interest rates, we could be adversely affected by the decline in the market value of our securities portfolio and other fixed income securities.

Further, we may lend money on a long-term, fixed interest rate basis, typically without an escalation clause in our loan agreements. Any increase in interest rates over the duration of such loans may result in our losing potential interest income. Our failure to pass on increased interest rates on our borrowings may cause our net interest income to decline, which would decrease our return on assets and could adversely affect our business, future financial performance and results of operations.

Also, when interest rates decline, we are subject to greater re-pricing and prepayment risks as borrowers take advantage of the attractive interest rate environment. In periods of low interest rates and high competition among lenders, borrowers may seek to reduce their borrowing cost by asking lenders to re-price loans. If we are required to restructure loans, it could adversely affect our profitability. If borrowers prepay loans, the return on our capital may be impaired if we are not able to deploy the received funds at similar interest rates. There can be no assurance that we will be able to adequately manage our interest rate risk in the future, which could have an adverse effect on our net interest margin.

3. *Any increase in the levels of non-performing assets in our loan portfolio, for any reason whatsoever, would adversely affect our business, results of operations and financial condition.*

With the growth in our business, we may see an increase in the levels of non-performing assets in in our loan portfolio. Should the overall credit quality of our loan portfolio deteriorate, the current level of our provisions may not be adequate to cover further increases in the amount of our NPAs. If the quality of our loan portfolio deteriorates or we are unable to implement effective monitoring and collection methods, our financial condition and results of operations may be affected. Further, there can be no assurance that there will be no further deterioration in our provisioning coverage as a percentage of gross NPAs or otherwise, or that the percentage of NPAs that we will be able to recover will be similar to our past experience of recoveries of NPAs.

As at March 31, 2016 and September 30, 2016, our gross NPAs as a percentage of our outstanding loans was 0.97% and 1.48%, respectively and our net NPAs, as a percentage of our outstanding loans, was 0.74% and 1.18%, respectively. The provisioning in respect of our outstanding loan portfolio has been undertaken in accordance with the NHB guidelines and other applicable laws. The provisioning requirements may also require the exercise of subjective judgments of management. The level of our provisions may be inadequate to cover further increases in the amount of our non-performing loans or decrease in the value of the underlying collateral. If our provisioning requirements are insufficient to cover our existing or future levels of non-performing loans or other loan losses that may occur, or if future regulation (or change in accounting standards) requires us to increase our provisions, our results of operation and financials may get adversely affected including our ability to raise additional capital and debt funds at favourable terms.

In addition, provisioning norms may be revised by the NHB from time to time and become more stringent for HFCs. The NHB has amended the provisioning norms in the NHB Directions 2010 pursuant to notification no.

NHB.HFC.DIR.3/CMD/2011 dated August 5, 2011, notification no. NHB.HFC.DIR.4/CMD/2012 dated January 19, 2012, and notification no. NHB.HFC.DIR.9/CMD/2013 dated September 6, 2013. Further, NHB's Master Circular bearing No. NHB(ND)/DRS/REG/MC-01/2016 dated July 1, 2016 has incorporated the provisioning norms for housing finance companies in one place. As a result of the aforesaid notifications, we have had to increase our provisioning in accordance with these norms as they changed. For further details, refer to the chapter "**Regulation and Policies**" on page 86.

If our customers are unable to meet their financial obligation in a timely manner, then it could adversely affect our results of operations. Any negative trends or financial difficulties particularly among our borrowers could increase the level of non-performing assets in our portfolio and adversely affect our business and financial performance. If a significant number of our customers are unable to meet their financial obligations in a timely manner, it may lead to an increase in our level of NPAs. If we are not able to prevent increases in our level of NPAs, our business and our future financial performance could be adversely affected.

4. *Our indebtedness and conditions and restrictions imposed by our financing arrangements could adversely affect our ability to conduct our business and operations.*

We have entered into agreements with certain banks and financial institutions for short-term and long-term borrowings. Some of these agreements contain restrictive covenants which require us to obtain consent from our lenders, before, amongst other things, altering our capital structure, disposing assets out of the ordinary course of business, incurring capital expenditure above certain limits, effecting any scheme of amalgamation or reconstitution, creating any charge or lien on the assets or receivables of the Company and any alteration to the Memorandum of Association or Articles of Association. In addition, upon the occurrence of an event of default, we would be restricted from declaring dividends. Certain of the loan agreements also give the lenders the right to nominate directors to the Board to protect the interest of the lenders. Our financing agreements also require us to maintain certain financial ratios.

In the event we breach any financial or other covenants contained in any of our financing arrangements or in the event we had breached any terms in the past which is noticed in the future, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. We may be forced to sell some or all of the assets in our portfolio if we do not have sufficient cash or credit facilities to make repayments. Furthermore, our financing arrangements contain cross-default provisions which could automatically trigger defaults under other financing arrangements.

We cannot assure you that our business will generate sufficient cash to enable us to service our debt or to fund our other liquidity needs. In addition, we may need to refinance all or a portion of our debt on or before maturity. We cannot assure you that we will be able to refinance any of our debt on commercially reasonable terms or at all.

5. *We have undertaken, and may undertake in the future, strategic acquisitions and alliances, which may be difficult to integrate, and may end up being unsuccessful.*

We have filed a Scheme of Arrangement with the High Court of Bombay in relation to acquisition of credit business undertaking of India Debt Management Private Limited with our Company. Further, our Board has in its meeting dated October 28, 2016 approved the demerger of "real estate lending business" of Reliance Capital Limited, our Promoter, into our Company, subject to receipt of requisite approvals.

The Company's ability to achieve the benefits it anticipates from aforementioned and future acquisitions and alliances, if any, will depend in large part upon whether it is able to integrate the acquired businesses into the rest of the Company in an efficient and effective manner. The integration and the achievement of synergies requires, among other things, coordination of business development and procurement efforts, manufacturing improvements and employee retention, hiring and training policies, as well as the alignment of products, sales and marketing operations, compliance and control procedures, research and development activities and information and software systems. Any difficulties encountered in combining operations could result in higher integration costs and lower savings than expected. The failure to successfully integrate an acquired business or the inability to realize the anticipated benefits of such acquisitions could materially and adversely affect the Company's business, results of operations, financial condition and prospects.

Further, acquired businesses may have unknown or contingent liabilities, including liabilities for failure to comply with relevant laws and regulations, and we may become liable for the past activities of such businesses. Although

we have policies in place to ensure that the practices of newly acquired facilities conform to our standards, and generally will seek indemnification from prospective sellers covering these matters, we may become liable for past activities of any acquired business. Further, we may be subject to various obligations or restrictions under the relevant transaction agreements or shareholders' agreement such as restrictions on the transfer of shares, tag-along rights, drag-along rights, right-of-first refusal for existing shareholders, lock-in clauses etc. These provisions may, as the case may be, prevent the Company from disposing or acquiring shares in the subject entities, or force the Company to sell or acquire shares in the subject entities against its better judgment.

6. *We regularly introduce new products for our customers, and there is no assurance that our new products will be profitable in the future.*

We regularly introduce new products and services in our existing lines of business. We may incur costs to expand our range of products and services and cannot guarantee that such new products and services will be successful once offered, whether due to factors within or outside of our control, such as general economic conditions, a failure to understand customer demand and market requirements or management focus on these new products. If we fail to develop and launch these products and services successfully, we may lose a part or all of the costs incurred in development and promotion or discontinue these products and services entirely, which could in turn adversely affect our business and results of operations.

7. *In order to sustain our growth, we will need to maintain a minimum capital adequacy ratio. There is no assurance that we will be able to access the capital markets when necessary in order to maintain such a ratio.*

The NHB Directions require a minimum capital adequacy ratio comprising of Tier I and Tier II capital aggregating to 12.00% to our total risk-weighted assets. We must maintain this minimum capital adequacy level to support our continuous growth. Our capital adequacy ratio was 14.08% as on September 30, 2016. Our ability to support and grow our business could be limited by a declining capital adequacy ratio if we are unable to or have difficulty accessing the capital markets.

8. *As a HFC, we face the risk of default and non-payment by borrowers. Any such defaults and non-payments would result in write-offs and/or provisions in our financial statements which may have a material adverse effect on our profitability and asset quality.*

Any lending activity is exposed to credit risk arising from the risk of default and non-payment by borrowers. Our gross outstanding loan portfolio has grown at a CAGR of 29.14% from ₹ 3,13,532.19 lakhs as of March 31, 2014 to ₹ 6,75,263.69 lakhs as of March 31, 2016. The size of our loan portfolio is expected to continue to grow as a result of our expansion strategy. As our portfolio expands, we will be exposed to an increasing risk of defaults. Any negative trends or financial difficulties among our borrowers could increase the level of non-performing assets in our portfolio and adversely affect our business and financial performance. The borrowers may default in their repayment obligations due to various reasons including insolvency, lack of liquidity, etc. Any such defaults and non-payments would result in write-offs and/or provisions in our financial statements which may materially and adversely affect our profitability and asset quality. Our loan portfolio stood at ₹ 7,90,455.60 lakhs as on September 30, 2016.

9. *We function in a highly regulated industry. Inability to meet the necessary regulatory requirements can have adverse effect on our reputation, business, financial condition, results of operations and cash flows. Also, our inability to adhere to any future regulatory changes may have a material adverse effect on our business, results of operations and financial condition.*

The operations of a HFC in India are subject to various regulations framed by the Ministry of Corporate Affairs and the NHB, amongst others. We are also subject to the corporate, taxation and other laws in effect in India which require continued monitoring and compliance. These regulations, apart from regulating the manner in which a company carries out its business and internal operation, prescribe various periodical compliances and filings including but not limited to filing of forms and declarations with the relevant registrar of companies and the NHB.

Our capital adequacy ratio was 14.08% as at September 30, 2016. As our asset book grows further our CRAR may decline and this may require us to raise fresh capital. There is no assurance that NHB will not increase the minimum capital adequacy requirements. Should we be required to raise additional capital in the future in order to maintain our CRAR above the existing and future minimum required levels, we cannot guarantee that we will be able to obtain this capital on favorable terms, in a timely manner or at all. Additionally, under Clause 29C of

the NHB Act, our Company is required to create a reserve fund and transfer to such fund an amount of no less than 20% of its net profits every year before any dividend is declared. If we fail to meet the requirements prescribed by the NHB, then the NHB may take certain actions, including but not limited to levying penalties, restricting our lending activities, investment activities and asset growth, and suspending all but our low-risk activities and imposing restrictions on the payment of dividends.

Furthermore, we are also subject to changes in Indian laws, regulations and accounting principles. There can be no assurance that the laws and regulations governing companies in India will not change in the future or that such changes or the interpretations or enforcement of existing and future laws and rules by governmental and regulatory authorities will not affect our business and future financial performance. The introduction of additional government controls or newly implemented laws and regulations, depending on the nature and extent thereof and our ability to make corresponding adjustments, may result in a material adverse effect on our business, results of operations and financial condition and our future growth plans. In particular, decisions taken by regulators concerning economic policies or goals that are inconsistent with our interests, could adversely affect our results of operations.

We cannot assure you that our Company will be in compliance with the various regulatory and legal requirements in a timely manner or at all. Further, we cannot assure you that we will be able to adapt to new laws, regulations or policies that may come into effect from time to time with respect to the housing finance industry in general. Further, changes in tax laws may adversely affect demand for real estate and therefore, for housing finance in India.

10. We are subject to periodic inspections by the NHB. Non-compliance with the NHB's observations made during any such inspections could adversely affect our reputation, business, financial condition, results of operations and cash flows.

The NHB conducts periodic inspections of our books of accounts and other records for the purpose of verifying the correctness or completeness of any statement, information or particulars furnished to the NHB or for obtaining any information which we may have failed to furnish on being called upon to do so. Inspection by the NHB is a regular exercise and is carried out periodically by the NHB for all housing finance institution under Section 34 of the NHB Act. Our Company has received inspection reports dated August 06, 2015 and May 26, 2016 for the Financial Years 2013-14, and 2014-15 which we replied to on September 23, 2015 and June 21, 2016, respectively. Further, we have received an inspection report for the Financial Year 2015-16 dated November 2, 2016. We are required to respond to the said report within 30 days of the report. In case we fail to respond to the said queries with the stipulated time or at all, NHB may take action against our Company which may adversely affect our reputation, business and financial condition.

In the past, the NHB had made certain observations during its periodic inspections in connection with our operations and had sought clarifications. Even though we have provided the NHB with necessary clarifications, and taken necessary steps to comply with the NHB's observations, any adverse notices or orders by the NHB during any future inspections could adversely affect our reputation, business, financial condition, results of operations and cash flows.

11. We are party to certain legal proceedings and any adverse outcome in these or other proceedings may adversely affect our business.

We are involved, from time to time, in legal proceedings that are incidental to our operations and involve suits filed by and against our Company by various parties. These include criminal proceedings, civil proceedings, arbitration cases, consumer proceedings, cases filed under the Negotiable Instruments Act and applications under the SARFAESI Act regarding enforcement of security interests. These proceedings are pending at different levels of adjudication before various courts, forums, authorities, tribunals and appellate tribunals. A significant degree of judgment is required to assess our exposure in these proceedings and determine the appropriate level of provisions, if any. There can be no assurance on the outcome of the legal proceedings or that the provisions we make will be adequate to cover all losses we may incur in such proceedings, or that our actual liability will be as reflected in any provision that we have made in connection with any such legal proceedings. For a summary of certain material legal proceedings involving our Company, our Promoter and Directors, please refer to the chapter "Outstanding Litigations and Defaults" on page 126.

12. We may face maturity mismatches between our assets and liabilities in the future which may cause liquidity issues.

We regularly monitor our funding levels to ensure we are able to satisfy the requirement for loan disbursements and maturity of our liabilities. As at March 31, 2016, our assets maturing within one year exceeded our liabilities maturing within the same period by ₹ 1,02,794.30 lakhs. As at March 31, 2016, however, our liabilities maturing between one year and three years exceeded our assets maturing during the same period by ₹ 2,09,247.38lakhs and our liabilities maturing between three and five years exceeded our assets maturing during the same period by ₹ 74,151.48lakhs, while our assets maturing in over five years exceeded our liabilities maturing in the same period by ₹ 1,85,656.75lakhs.

We maintain diverse sources of funding and liquid assets to facilitate flexibility in meeting our liquidity requirements. Liquidity is provided principally by long-term borrowings from banks, insurance companies, providend funds, pension funds, gratuity funds, mutual funds etc., short and long-term general financing through the domestic debt markets and retained earnings, proceeds from securitization and equity issuances.

Our liquidity position could be adversely affected and we may be required to pay higher interest rates in order to attract or retain our borrowings in order to meet our liquidity requirements in the future, which could have a material adverse effect on our business and financial results.

13. If we fail to identify, monitor and manage risks and effectively implement our risk management policies, it could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We have devoted resources to develop our risk management policies and procedures and aim to continue to do so in the future. Please refer to the chapter titled “**Our Business**” on page 68. Despite this, our policies and procedures to identify, monitor and manage risks may not be fully effective. Some of our risk management systems are not automated and are subject to human error. Some of our methods of managing risks are based upon the use of observed historical market behavior. As a result, these methods may not accurately ascertain future risk exposures, which could be significantly greater than those indicated by the historical measures.

To the extent any of the instruments and strategies we use to hedge or otherwise manage our exposure to market or credit risk are not effective, we may not be able to mitigate effectively our risk exposures in particular market environments or against particular types of risk. Further, some of our risk management strategies may not be effective in a difficult or less liquid market environment, where other market participants may be attempting to use the same or similar strategies to deal with the difficult market conditions. In such circumstances, it may be difficult for us to reduce our risk positions due to the activity of such other market participants. Other risk management methods depend upon an evaluation of information regarding markets, clients or other matters. This information may not in all cases be accurate, complete, up-to-date or properly evaluated.

Our investment and interest rate risk are dependent upon our ability to properly identify, and mark-to-market changes in the value of financial instruments caused by changes in market prices or rates. Our earnings are dependent upon the effectiveness of our management of changes in credit quality and risk concentrations, the accuracy of our valuation models and our critical accounting estimates and the adequacy of our allowances for loan losses.

To the extent our assessments, assumptions or estimates prove inaccurate or not predictive of actual results, we could suffer higher than anticipated losses. Please refer to the Risk Factor titled “*If the level of non-performing assets in our loan portfolio were to increase, our financial condition would be adversely affected*”.

If we fail to effectively implement our risk management policies, it could materially and adversely affect our business, financial condition, results of operations and cash flows.

14. Inaccurate appraisal of credit may adversely impact our business

We may be affected by failure of employees to comply with internal procedures and inaccurate appraisal of credit or financial worth of our clients. Inaccurate appraisal of credit may allow a loan sanction which may eventually result in a NPA on our books of accounts. In the event we are unable to check the risks arising out of such lapses, our business and results of operations may be adversely affected.

15. We may be unable to realize the expected value of collateral when borrowers default on their obligations to us, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We follow internal risk management guidelines in relation to portfolio monitoring. However, we may not be able to realize the full value of the collateral as a result of the following (among other factors):

- delays in bankruptcy and foreclosure proceedings;
- defects or deficiencies in the perfection of collateral (including due to inability to obtain any approvals that may be required from third parties);
- destruction/ material damage to the underlying property.
- fraud by borrowers;
- errors in assessing the value of the collateral;
- illiquid market for the sale of the collateral; and
- applicable legislative provisions or changes thereto and past or future judicial pronouncements.

As a result of any of the foregoing factors, we may not be able to realize the full value of collateral, which could have an adverse effect on our financial condition, results of operations and cash flows.

16. As a HFC, we have significant exposure to the real estate sector and any negative events affecting this sector could adversely affect our business and result of operations.

Our lending products include retail mortgage loans and residential project loans. Retail loans are bifurcated into housing loans and property (non-housing) loans. Housing loans include home purchase loans, home improvement loans, home construction loans, home extension loans, home loans for self-employed customers, plot/land loans and plot and construction loans. Property (non-housing) loans include loans against property (mortgage loans), commercial loans, lease rental finance, project loans and SME loans and are availed for working capital and other business needs and construction of residential projects.

The primary security for the loans disbursed by the Company is the underlying property; the value of this security is largely dependent on housing market conditions prevalent at that time. The value of the collateral on the loans disbursed by the Company may decline due to adverse market conditions, including an economic downturn or a downward movement in real estate prices. In the event the real estate sector is adversely affected due to a decline of demand for real properties, changes in regulations or other trends or events, which negatively impact the real estate sector, the value of our collaterals may diminish which may affect our business and results of operations. Failure to recover the expected value of collateral could expose the Company to losses and, in turn, result in a material adverse effect on our business, results of operations and financial condition.

Following the introduction of the SARFAESI Act and the subsequent extension of its application to HFCs, we are allowed to foreclose on secured property after 60 days' notice to a borrower, whose loan has been classified as non-performing. Although the enactment of the SARFAESI Act has strengthened the rights of creditors by allowing expedited enforcement of security in an event of default, there is still no assurance that we will be able to realize the full value of our collateral, due to, among other things, delays on our part in taking action to secure the property, delays in bankruptcy foreclosure proceedings, stock market downturns, defects in the perfection of collateral and fraudulent transfers by borrowers.

17. Our growth in profitability depends on the continued growth of our loan portfolio.

Our results of operations depend on a number of internal and external factors, including changes in demand for housing loans in India, the competitive landscape, our ability to expand geographically and diversify our product offerings and the size of our loan portfolio. Changes in market interest rates could impact the interest rates charged on our interest-earning assets in a way different to its effect on the interest rates paid on our interest-bearing liabilities, and thus affecting the value of our investments. Further, we may experience issues such as capital constraints. We cannot assure that we will be able to expand our existing business and operations successfully, or that we will be able to retain existing personnel or to hire and train new personnel to manage and operate our expanded business.

18. We may not be able to secure the requisite amount of financing at competitive rates for our growth plans and continue to gain uninterrupted access to our funding sources, which could adversely affect our business, results of operations and financial condition.

Our liquidity and ongoing profitability are, in large part, dependent upon our timely access to, and the costs associated with, raising capital. Our funding requirements historically have been met predominantly from a

combination of borrowings such as loans from banks and financial institutions (including issuance of commercial papers and Non Convertible debentures on private placement basis). Thus, our continued growth will depend, among other things, on our ability to secure requisite financing at competitive rates, to manage our expansion process, to make timely capital investments, to control input costs and to maintain sufficient operational control.

Our inability to secure requisite financing could have an adverse effect on our business, operations and financial condition. Changes in Indian laws and regulations, our obligations to lenders or under debt instruments can disrupt funding sources which would have a material adverse effect on our liquidity and financial condition. Further, any inability on our part to secure requisite financing or continue with our existing financing arrangement could have an adverse effect on our business, results of operations and financial condition.

19. There are certain risks in connection with the Un-Secured NCDs being issued in this Issue.

The Un-Secured NCDs will be in the nature of subordinated debt and will be eligible for inclusion as Upper Tier II Capital and hence the claims of the holders thereof, although will be superior to the claims of investors in instruments eligible for inclusion in Tier I capital, they will be subordinated to the claims of all other creditors of our Company. Further, since no charge upon the assets of our Company would be created in connection with the Un-Secured NCDs, in the event of default in connection therewith, the holders of NCDs may not be able to recover their principal amount and/or the interest accrued therein in a timely manner, for the entire value of the NCDs held by them or at all. Further, as the Un-Secured NCDs are in the nature of Upper Tier II instruments they shall be subjected to a lock-in clause in terms of which our Company may not be liable to pay either interest or principal, even at maturity, in case our (i) CRAR is below the minimum regulatory requirement prescribed by NHB or (ii) the impact of such payment results in our Company's CRAR falling below or remaining below the minimum regulatory requirement prescribed by NHB.

Accordingly, in such a case the holders of NCDs may lose all or a part of their investment therein. Further, the payment of interest and the repayment of the principal amount in connection with the NCDs would be subject to the requirements of NHB, which may also require our Company to obtain a prior approval from the NHB in certain circumstances. For further details, refer to the "**Regulations and Policies - Terms and conditions applicable to debt capital instruments to qualify for inclusion as Upper Tier II Capital**" on page 89.

20. Any downgrade in our credit ratings may increase interest rates for refinancing our outstanding debt, which would increase our financing costs, and adversely affect our future issuances of debt and our ability to borrow on a competitive basis.

We have received the following credit ratings for our existing domestic fund raising:

Nature of borrowing	Rating / Outlook			
	CARE	Brickwork	ICRA	CRISIL
Long Term Debt	CARE AA+	BWR AA+	-	-
Short Term Debt	-	-	A1+	A1+
Tier II Un-Secured Debt	CARE AA+	BWR AA+	-	-
Market linked Debentures	CARE PP-MLD AA+	-	-	-

These ratings indicate very strong or strong degree of safety regarding timely servicing of financial obligations and allow us to access debt financing at competitive rates of interest. Any downgrade in our credit ratings may increase interest rates for refinancing our outstanding debt, which would increase our financing costs, and adversely affect our future issuances of debt and our ability to borrow on a competitive basis, which may adversely affect our business, results of operations and financial condition.

21. Our ability to raise foreign capital may be constrained by Indian law.

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted without onerous conditions, or at all. Limitations on raising foreign debt may have an adverse effect on our business, results of operations and financial condition.

22. Our investments are subject to market risk and our exposure to capital markets is subject to certain regulatory limits.

As part of our treasury management, we invest surplus funds out of our borrowings and operations in government securities, bonds carrying sovereign guarantee, bonds issued by state governments or public sector enterprises, debt mutual funds, fixed deposits with banks and other highly rated bonds. Our investment policy prescribes investment limits for each of these securities. Certain of these investments are unlisted, offering limited exit options. The value of these investments depends on several factors beyond our control, including the domestic and international economic and political scenario, inflationary expectations and the RBI's monetary policies. Any decline in the value of the investments may have an adversely effect on our business, financial condition and results of operations. Further, pursuant to the NHB Directions, we are not permitted to have an aggregate exposure to capital markets (both fund and non-fund based) in excess of 40.00% of our net worth as of the end of the previous financial year. Within the overall ceiling, direct investments in shares, convertible bonds or debentures, units of equity-oriented mutual funds and all exposures to venture capital funds should not exceed 20.00% of our net worth. Such restrictions may limit our investments, which may have an adverse effect on our business, financial condition and results of operations.

23. *We have contingent liabilities as at March 31, 2016 and our financial condition may be adversely affected if these contingent liabilities materialise.*

The table below sets forth our contingent liabilities on a consolidated basis not provided for in our financial statements as at March 31, 2016:

(₹ in lakhs)	
Particulars	Amount as at March 31, 2016
Case against the Company not acknowledged as Debts	48.44
Second loss credit enhancement for securitisation of standard assets transactions provided by the third party	2,209.11
Total	2,257.55

The contingent liabilities have arisen in the normal course of our business and are subject to the prudential norms as prescribed by the NHB. If any of the above contingent liabilities materialize, our financial condition may be adversely affected.

24. *We are party to certain legal proceedings and any adverse outcome in these or other proceedings may adversely affect our business.*

We are involved in several legal proceedings in the ordinary course of our business such as consumer disputes, debt-recovery proceedings, proceedings under the SARFAESI Act, income tax proceedings and civil disputes. These proceedings are pending at different levels of adjudication before various courts, tribunals and appellate tribunals. A significant degree of judgment is required to assess our exposure in these proceedings and determine the appropriate level of provisions, if any. Although we expect that none of these legal proceedings, either individually or in the aggregate, will have a material adverse effect on us or our financial condition, there can be no assurance on the outcome of the legal proceedings or that the provisions we make will be adequate to cover all losses we may incur in such proceedings, or that our actual liability will be as reflected in any provision that we have made in connection with any such legal proceedings.

Although we intend to defend or appeal these proceedings, we will be required to devote management and financial resources in their defense or prosecution. If a significant number of these disputes are determined against our Company and if our Company is required to pay all or a portion of the disputed amounts or if we are unable to recover amounts for which we have filed recovery proceedings, there could be an adverse impact on our reputation, business, results of operations and financial condition.

25. *We may not be able to renew or maintain our statutory and regulatory permits and approvals required to operate our business.*

We require certain statutory and regulatory permits and approvals to operate our business. We have a license from the NHB, which requires us to comply with certain terms and conditions for us to continue our housing finance operations. In the event that we are unable to comply with any or all of these terms and conditions, or seek waivers or extensions of time for complying with these terms and conditions, it is possible that the NHB may revoke this license or may place stringent restrictions on our operations. This may result in the interruption of all or some of our operations. Further, under certain of our contractual arrangements, we are required to obtain and hold all necessary and applicable approvals, registrations and licenses from authorities such as the SEBI, local government authorities, etc.

Failure by us to renew, maintain or obtain the required permits, licenses or approvals, including those set out above, may have a material adverse effect on our business, results of operations and cash flows.

26. Our business is dependent on relationships with our clients established through, amongst others, our branches. Closure of branches or loss of our key branch personnel may lead to damage to these relationships and a decline in our revenue and profits.

Our business is dependent on the key branch personnel who directly manage client relationships. We encourage dedicated branch personnel to service specific clients since we believe that this leads to long-term client relationships, a trust based business environment and, over time, better cross-selling opportunities. While no branch manager or operating group of managers contributes a meaningful percentage of our business, our business may suffer materially if a substantial number of branch managers either become ineffective or leave the Company.

27. Our business and operations significantly depend on senior management and key employees and may be adversely affected if we are unable to retain them.

Our business and operations largely depend on the continued services and performance of our senior management and other key employees. The need and competition for skilled senior management in our industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our senior members of our management team and key employees could seriously impair our ability to continue to manage and expand our business efficiently and adversely affect our business, results of operations and financial condition.

28. Our business is subject to operational risks, including fraud.

We are exposed to many types of operational risks, including the risk of fraud or other misconduct by employees or outsiders, unauthorized transactions by employees, inadequate training and operational errors, improperly documented transactions, failure of operational and information security procedures, computer systems, software or equipment. We attempt to mitigate operational risk by maintaining a comprehensive system of internal controls, establishing systems and procedures to monitor transactions, maintaining key back-up procedures, undertaking regular contingency planning and providing employees with continuous training. Although we carefully recruit all our employees, we have in the past been subject to the fraudulent acts committed by our employees or third parties. As a result, we have suffered monetary losses and may suffer further monetary losses, which may not be covered under our insurance and may thereby adversely affect our profitability and results of operations. Further, our reputation could be adversely affected by significant frauds committed by employees, customers or outsiders. Any failure to mitigate such risks could adversely affect our business and results of operations.

In order to prevent frauds in loan cases involving multiple lending from different banks or HFCs, the GoI has set up the CERSAI under Section 20 of the SARFAESI Act, 2002 in order to create a central database of all mortgages given by and to lending institutions. We are registered with CERSAI and we submit the relevant data to CERSAI from time to time. We also appoint a number of providers of credit verification and investigation services to obtain information on the credit worthiness of our prospective customers. However, there can be no assurance that these measures will be effective in preventing frauds.

We seek to protect our computer systems and network infrastructure from physical break-ins as well as fraud and system failures. Computer break-ins and power and communication disruptions could affect the security of information stored in and transmitted through our computer systems and network infrastructure. We employ security systems, including firewalls and password encryption, designed to minimize the risk of security breaches. Although we intend to continue to implement security technology and establish operational procedures to prevent fraud, break-ins, damage and failures, there can be no assurance that these security measures will be adequate. A significant failure of security measures or operational procedures could have a material adverse effect on our business and our future financial performance. Further, we may need to regularly upgrade our technology systems, at substantial cost, to increase efficiency and remain competitive. There can be no assurance that such technology upgrades will be successful and that we will recover the cost of our investments.

We have initiated the exercise to convert all loan documentation into electronic files, we continue to maintain all loan documentation, including original security documents, in physical custody using third party services for storage. Loss of the original documents could impede enforcement of our security interest and expose us to liability towards our customers.

29. *Our business is highly dependent on information technology. A failure, inadequacy or security breach in our information technology and telecommunication systems or an inability to adapt to rapid technological changes may adversely affect our business, results of operation and financial condition.*

Our ability to operate and remain competitive depends in part on our ability to maintain and upgrade our information technology systems and infrastructure on a timely and cost-effective basis, including our ability to process a large number of transactions on a daily basis. Our operations also rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Our financial, accounting or other data processing systems and management information systems or our corporate website may fail to operate adequately or become disabled as a result of events that may be beyond our control, including a disruption of electrical or communications services. Further, our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other attacks that may compromise data integrity and security and result in client information or identity theft, for which we may potentially be liable. Further, the information available to and received by our management through our existing systems may not be timely and sufficient to manage risks or to plan for and respond to changes in market conditions and other developments in our operations. If any of these systems are disabled or if there are other shortcomings or failures in our internal processes or systems, it may disrupt our business or impact our operational efficiencies, and render us liable to regulatory intervention or damage to our reputation. The occurrence of any such events may adversely affect our business, results of operations and financial condition.

We are dependent on various external vendors for the implementation of the program and certain other elements of our operations, including implementing information technology infrastructure and hardware, industry standard commercial off-the-shelf products, branch roll-outs, networking, managing our data-center and back-up support for disaster recovery. We are, therefore, exposed to the risk that external vendors or service providers may be unable to fulfill their contractual obligations to us (or will be subject to the risk of fraud or operational errors by their respective employees) and the risk that their (or their vendors') business continuity and data security systems prove to be inadequate or fail to perform. Failure to perform any of these functions by our external vendors or service providers could materially and adversely affect our business, results of operations and cash flows.

In addition, the future success of our business will depend in part on our ability to respond to technological advances and to emerging industry standards and practices on a cost-effective and timely basis. The development and implementation of such technology entail significant technical and business risks. There can be no assurance that we will successfully implement new technologies effectively or adapt our technology and systems to meet customer requirements or emerging industry standards. If we are unable, for technical, legal, financial or other reasons, to adapt in a timely manner to changing market conditions, customer requirements or technological changes, our financial condition could be adversely affected. Any technical failures associated with our information technology systems or network infrastructure, including those caused by power failures and breaches in security caused by computer viruses and other unauthorized tampering, may cause interruptions or delays in our ability to provide services to our customers on a timely basis or at all, and may also result in added costs to address such system failures and/or security breaches, and for information retrieval and verification.

30. *We depend on the accuracy and completeness of information provided by our potential borrowers. Our reliance on any misleading information given by potential borrowers may affect our judgment of credit worthiness of potential borrowers, and the value of and title to the collateral, which may affect our business, results of operations and financial condition.*

In deciding whether to extend credit or enter into other transactions with potential borrowers, we rely on information furnished to us by potential borrowers, and analysis of the information by independent valuers and advocates. To further verify the information provided by potential borrowers, we conduct searches on CIBIL and other third party sources for creditworthiness of our borrowers. We also verify information with registrar and sub-registrar of assurances for encumbrances on collateral. We follow the KYC guidelines as prescribed by the NHB on the potential borrower, verify the place of business or place of employment as applicable to the potential borrower and also verify the details with the caution list of the NHB as circulated from time to time. Such information includes representations with respect to the accuracy and completeness of information relating to the financial condition of potential borrowers, and independent valuation reports and title reports with respect to the property secured. We have framed our policies to prevent frauds in accordance with the KYC guidelines issued by NHB dated October 11, 2010 mandating the policies of HFCs to have certain key elements, including, inter-alia, a customer acceptance policy, customer identification procedures, monitoring of transactions and risk management. Further, our Company has a well-established and streamlined credit appraisal process. We cannot assure you that information furnished to us by potential borrowers and analysis of the information by us or

independent valuers or the independent searches conducted by us with CIBIL and NHB will be accurate, and our reliance on such information given by potential borrowers may affect our judgment of the credit worthiness of potential borrowers, and the value of and title to the collateral, which may affect our business, results of operations and financial condition.

31. Our insurance coverage may not adequately protect us against losses, and successful claims that exceed our insurance coverage could harm our results of operations and diminish our financial position.

Various types of insurance covers are taken at a centralized level covering all the subsidiaries of Reliance Capital Limited, including our Company. While we believe that we have necessary and adequate general insurance for burglary, employee fidelity, Directors and Officers Liability insurance which are commensurate with our operations. Our insurance policies, however, may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, results of operations and financial condition.

32. We are permitted to use the design as part of our logo by Reliance Capital Limited, subject to conditions. Any violation of the conditions may result in us being unable to use the aforementioned design as part of our logo which could have a material adverse effect on our reputation, goodwill, business, results of operations and financial condition.

As part of the Reliance Group, our Promoter and its subsidiaries are permitted to use the  design as part of their logo by Anil Dhirubhai Ambani Ventures Private Limited pursuant to an agreement between Anil Dhirubhai Ambani Ventures Private Limited and our Promoter (“Logo Agreement”) dated April 1, 2014. We haven’t entered into any definitive agreement for using the said design with Anil Dhirubhai Ambani Ventures Private Limited.

As a result, any violation of the conditions stipulated in the Logo agreement may result in us being unable to use the aforementioned design as part of our logo which could have a material adverse effect on our reputation, goodwill, business, results of operations and financial condition.

33. Our registered office and certain of our branch offices are not owned by us.

Our registered office is not owned by us. In addition, we do not own most of the offices from which our branches conduct our operations. All such non-owned properties are either leased or licensed to us or to our Promoter, RCL and we function from such premises on cost sharing basis. If the owners of these properties do not renew the agreements under which we occupy the premises or only agree to renew such agreements on terms and conditions that are unacceptable to us, or if the owners of such premises withdraw their consent to our occupancy, our operations may suffer a disruption. We may be unable to locate suitable alternate facilities on favorable terms, or at all, and this may have a material adverse effect on our business, results of operations and financial condition.

34. We have entered into a number of related party transactions and may continue to enter into related party transactions, which may involve conflicts of interest.

We have entered into a number of related party transactions, within the meaning of AS 18. Such transactions may give rise to current or potential conflicts of interest with respect to dealings between us and such related parties. Additionally, there can be no assurance that any dispute that may arise between us and related parties will be resolved in our favor. For details of the related party transactions, please refer to the chapter “Financial Statements” on page 108.

35. We may not be able to detect money-laundering and other illegal or improper activities fully or on a timely basis, which could expose us to additional liability and harm our business or reputation.

We are required to comply with applicable anti-money-laundering and anti-terrorism laws and other regulations in India. We, in the course of our operations, run the risk of failing to comply with the prescribed KYC procedures and the consequent risk of fraud and money laundering by dishonest customers despite putting in place systems and

controls to prevent the occurrence of these risks as is customary in our jurisdiction. We in certain of our activities and in our pursuit of business, run the risk of inadvertently offering our financial products and services ignoring customer suitability and appropriateness despite having a Board-approved Know Your Customer and Anti-Money Laundering policy in place. Such incidents may adversely affect our business and our reputation.

36. Substantial portion of our loans have long tenures, which may expose us to risks associated with economic cycles.

As of September 30, 2016, a substantial portion of our loans advanced to customers had long tenures. The long tenor of these loans may expose us to risks arising out of economic cycles. In addition, some of these loans are project finance loans and there can be no assurance that these projects will perform as anticipated or that such projects will be able to generate sufficient cash flows to service commitments under the advances. We are also exposed to residential projects that are still under development and are open to risks arising out of delay in execution, such as delay in execution on time, delay in getting approvals from necessary authorities and breach of contractual obligations by counterparties, all of which may adversely impact our cash flows. There can also be no assurance that these projects, once completed, will perform as anticipated. Risks arising out of economic downturn, delays in project implementation or commissioning could lead to a rise in delinquency rates and in turn, may materially and adversely affect our business, financial condition and results of operations.

37. This Shelf Prospectus includes certain Unaudited Financial Results, which have been subjected to limited review, in relation to our Company. Reliance on such information should, accordingly, be limited.

This Shelf Prospectus includes certain audited financial results in relation to our Company, for the half year ended September 30, 2016 in respect of which the Statutory Auditors of our Company have issued their Limited Review Report dated October 22, 2016. As this financial information has been subject only to review as required under regulation 52 of the SEBI LODR Regulations, and also as described in the Standard on Review Engagements (“SRE”) 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” issued by ICAI, and not to an audit, any reliance by prospective investors on such financial results should accordingly, be limited.

Moreover, our financial results for any given fiscal quarter or period, including the half year ended September 30, 2016, may not be directly comparable with our financial results for any full fiscal or for any other fiscal quarter or period. Accordingly, prospective investors to the Issue are advised to read such audited financial results in conjunction with the audited financial information provided elsewhere in this Shelf Prospectus

38. We are dependent on Reliance Capital Limited, our Promoters and the Reliance Group for the goodwill that we enjoy in the industry and our brand name and any factor affecting the business and reputation of Reliance Capital Limited may have a concurrent adverse effect on our business and results of operations.

As on the date of this Shelf Prospectus our Promoter holds 100% of our paid up capital. We leverage on the goodwill of the Reliance Group. We believe that this goodwill ensures a steady inflow of business. In the event Reliance Group is unable to maintain the quality of its services or its goodwill deteriorates for any reason whatsoever, our business and results of operations may be adversely affected. We operate in a competitive environment, and we believe that our brand recognition is a significant competitive advantage to us. Any failure to retain our Company name may deprive us of the associated brand equity that we have developed which may have a material adverse effect on our business and results of operations.

39. Any change in control of our Promoters or our Company may correspondingly adversely affect our goodwill, operations and profitability.

As on the date of this Shelf Prospectus our Promoter holds 100% of our paid up capital. If our Promoter ceases to exercise majority control over our Company as a result of any transfer of shares or otherwise, our ability to derive any benefit from the brand name “Reliance” and our goodwill as a part of the Reliance Group may be adversely affected, which in turn could adversely affect our business and results of operations. Any disassociation of our Company from the Reliance Group and/or our inability to have access to the infrastructure provided by other companies in the Reliance Group could adversely affect our ability to attract customers and to expand our business, which in turn could adversely affect our goodwill, operations and profitability.

B. External Risks

40. A slowdown in economic growth in India may adversely affect our business, results of operations and financial condition.

Our financial performance and the quality and growth of our business depend significantly on the health of the overall Indian economy, the gross domestic product growth rate and the economic cycle in India. A substantial portion of our assets and employees are located in India, and we intend to continue to develop and expand our facilities in India.

Our performance and the growth of our business depend on the performance of the Indian economy and the economies of the regional markets we currently serve. These economies could be adversely affected by various factors, such as political and regulatory changes including adverse changes in liberalization policies, social disturbances, religious or communal tensions, terrorist attacks and other acts of violence or war, natural calamities, interest rates, commodity and energy prices and various other factors. Any slowdown in these economies could adversely affect the ability of our customers to afford our services, which in turn would adversely affect our business, results of operations and financial condition.

41. The Indian housing finance industry is competitive and increasing competition may result in declining margins if we are unable to compete effectively.

Historically, the housing finance industry in India was dominated by HFCs. We now face increasing competition from commercial banks. Interest rate deregulation and other liberalization measures affecting the housing finance industry, together with increased demand for home finance, have increased our exposure to competition. Our ability to compete effectively with commercial banks and other HFCs will depend, to some extent, on our ability to raise low-cost funding in the future. If we are unable to compete effectively with other participants in the housing finance industry, our business, results of operations and financial condition may be adversely affected.

Furthermore, as a result of increased competition in the housing finance industry, home loans are becoming increasingly standardized and terms such as floating rate interest options, lower processing fees and monthly rest periods are becoming increasingly common in the housing finance industry in India. There can be no assurance that the Company will be able to react effectively to these or other market developments or compete effectively with new and existing players in the increasingly competitive housing finance industry. Increasing competition may have an adverse effect on our net interest margin and other income, and, if we are unable to compete successfully, our market share may decline as the origination of new loans declines.

42. The growth rate of India's housing finance industry may not be sustainable.

We expect the housing finance industry in India to continue to grow as a result of anticipated growth in India's economy, increases in household income, further social welfare reforms and demographic changes. However, it is not clear how certain trends and events, such as the pace of India's economic growth, the development of domestic capital markets and the ongoing reform will affect India's housing finance industry. In addition, there can be no assurance that the housing finance industry in India is free from systemic risks. Consequently, there can be no assurance that the growth and development of India's housing finance industry will be sustainable.

43. If inflation were to rise significantly in India, we might not be able to increase the prices of our products at a proportional rate in order to pass costs on to our customers and our profits might decline.

Inflation rates in India has been trending lower since last few months, however, continues to see some volatility due to food inflation. It might see such volatility in the future as well. The year-on-year inflation in terms of the WPI was 3.2% for the month of November 2016 as compared to (2.0) % in November 2015. CPI inflation for November 2016 stood at 3.6% vs 5.4% seen in November 2015. The latest Monetary Policy Statement (by MPC) released in December 2016 stated that core inflation remains sticky and although inflation target of 5% was retained it stated that risks were tilted on the upside. The main risks to the outlook are uncertainties such as commodity prices, monsoon and weather-related disturbances, volatility in prices of seasonal items and spillovers from external developments through exchange rate and asset price channels, according to the RBI.

In the event of increasing inflation in India, our costs, such as operating expenses, may increase, which could have an adverse effect on our business, results of operations and financial condition.

44. Public companies in India, including us, may be required to prepare financial statements under

Ind-AS. The transition to Ind-AS in India is still unclear and we may be adversely affected by this transition.

The MCA modified the “Companies (Indian Accounting Standards) Rules, 2015” on February 16, 2015 (“IAS Rules”). The IAS Rules provide that the financial statements of the companies to which they apply (as more specifically described below) shall be prepared and audited in accordance with Ind-AS. Under the IAS Rules, any company may voluntarily implement Ind-AS for the accounting period beginning from April 1, 2015. Further, the IAS Rules prescribe that any company having a net worth of more than ₹ 50,000 lakhs, and any holding company, subsidiary, joint venture or an associate company of such company, would have to mandatorily adopt Ind-AS for the accounting period beginning from April 1, 2016 with comparatives for the period ending March 31, 2016. These IAS Rules were initially not applicable to banking companies, insurance companies and NBFCs/ HFCs. However, MCA published its press release dated January 18, 2016 and laid down the road map for implementation of Ind-AS for scheduled commercial banks, insurance companies and NBFCs/ HFCs (with net worth of ₹ 50,000 lakhs or more) from April 1, 2018 onwards.

We may not be able to ascertain the impact of such rules on the Company’s financial reporting. There can be no assurance that the Company’s financial condition, results of operations, cash flows or changes in shareholders’ equity will not appear materially worse under Ind-AS than under Indian GAAP. In the Company’s transition to Ind-AS reporting, our Company may encounter difficulties in the ongoing process of implementing and enhancing its management information systems. Moreover, there is increasing competition for the small number of Ind-AS experienced accounting personnel available as more Indian companies begin to prepare Ind-AS financial statements. Further, there is no significant body of established practice on which to draw in forming judgments regarding the new system’s implementation and application. There can be no assurance that our Company’s adoption of Ind-AS will not adversely affect its reported results of operations or financial condition and any failure to successfully adopt Ind-AS could adversely affect our Company’s business, results of operations and financial condition.

45. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of our financial condition.

Our financial statements, including the financial statements provided in this Shelf Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Shelf Prospectus, nor do we provide a reconciliation of its financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. Accordingly, the degree to which the Indian GAAP financial statements included in this Shelf Prospectus will provide meaningful information entirely depends on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Shelf Prospectus should accordingly be limited.

46. We may have to comply with stricter regulations and guidelines issued by regulatory authorities in India, including the NHB.

We are regulated principally by and have reporting obligations to the NHB. We are also subject to the corporate, taxation and other laws in effect in India. The regulatory and legal framework governing us differs in certain material respects from that in effect in other countries and may continue to change as India’s economy and commercial and financial markets evolve. In recent years, existing rules and regulations have been modified, new rules and regulations have been enacted and reforms have been implemented which are intended to provide tighter control and more transparency in India’s housing finance sector.

47. Borrowing for the purchase or construction of property may not continue to offer borrowers the same fiscal benefits it currently offers and the housing sector may not continue to be regarded as a priority sector by the GoI.

The rapid growth in the housing finance industry in India in the last decade is in part due to the introduction of fiscal benefits for homeowners. Since the early 1990s, interest and principal repayments on capital borrowed for the purchase or construction of housing have been tax deductible up to certain limits and tax rebates have been available for borrowers of such capital up to specified income levels. There can be no assurance that the GoI will continue to offer such tax benefits to borrowers at the current levels or at all. In addition, there can be no assurance that the GoI will not introduce tax efficient investment options which are more attractive to borrowers than property investment. The demand for housing and/or housing finance may be reduced if any of these changes occur.

48. Civil unrest, acts of violence, including terrorism or war involving India and other countries, could materially and adversely affect the financial markets and our business.

Civil unrest, acts of violence, including terrorism or war, may negatively affect the Indian stock markets and also materially and adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, make travel and other services more difficult and ultimately materially and adversely affect our business. Although the governments of India and neighboring countries have recently been engaged in conciliatory efforts, any deterioration in relations between India and neighboring countries might result in investor concern about stability in the region, which could materially and adversely affect our business, results of operations and financial condition.

49. Financial difficulty and other problems in certain financial institutions in India could adversely affect our business, results of operations and financial condition.

As an HFC, we are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is sometimes referred to as “systemic risk”, may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Any such difficulties or instability of the Indian financial system in general could create an adverse market perception about Indian financial institutions and banks and adversely affect our business, results of operations and financial condition. As the Indian financial system operates within an emerging market, it faces risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme.

50. Any volatility in the exchange rate and increased intervention by the Reserve Bank of India in the foreign exchange market may lead to a decline in India’s foreign exchange reserves and may affect liquidity and interest rates in the Indian economy, which could adversely impact us.

During the first half of FY 2013-2014, emerging markets including India, witnessed significant capital outflows due to concerns regarding the withdrawal of quantitative easing in the U.S. and other domestic structural factors such as high current account deficits and lower growth outlook. As a result, the Indian rupee depreciated by 21.1% from ₹ 56.5 per U.S. dollar at the end of May 2013 to ₹ 68.4 per U.S. dollar on August 28, 2013. To manage the volatility in the exchange rate, the Reserve Bank of India took several measures including increasing in the marginal standing facility rate by 200 basis points and reduction in domestic liquidity. The Reserve Bank of India also subsequently announced measures to attract capital flows, particularly targeting the non-resident Indian community. Subsequent to restoring stability in the exchange rate from September 2013 onwards, the Reserve Bank of India reversed some of these measures. In February 2016, the Indian rupee has continued to experience volatility nearing its record low in August 2013, thereby forcing RBI to intervene again. Any similar intervention in the foreign exchange market or other measures by the Reserve Bank of India to control the volatility of the exchange rate may result in a decline in India’s foreign exchange reserves, reduced liquidity and higher interest rates in the Indian economy, which could adversely affect our business and our future financial performance.

51. Natural disasters and other disruptions could adversely affect the Indian economy and could adversely affect our business, results of operations and financial condition.

Our operations, including our branch network, may be damaged or disrupted as a result of natural disasters such as earthquakes, floods, heavy rainfall, epidemics, tsunamis and cyclones and other events such as protests, riots and labor unrest. Such events may lead to the disruption of information systems and telecommunication services for sustained periods. They also may make it difficult or impossible for employees to reach our business locations. Damage or destruction that interrupts our provision of services could adversely affect our reputation, our relationships with our customers, our senior management team’s ability to administer and supervise our business or it may cause us to incur substantial additional expenditure to repair or replace damaged equipment or rebuild parts of our branch network. Any of the above factors may adversely affect our business, results of operations and financial condition.

52. Any downgrading of India’s debt rating by rating agencies could have a negative impact on our business

Any adverse revisions to India’s credit ratings for domestic and international debt by rating agencies may adversely impact our ability to raise additional financing, the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, our ability to raise financing for onward lending and the price of our NCDs.

53. *Our Company, in the ordinary course of business may avail further borrowings and/or retire some of our Company's existing debt. The debt position of our Company may therefore undergo a change in between the period from filing of this Shelf Prospectus and the listing of the NCDs.*

Our Company's borrowing comprises of borrowings from financial institutions, issue of debt securities, commercial papers, etc. During the period from the date of filing of relevant Tranche Prospectus pursuant to this Shelf Prospectus till the listing of the NCDs issued pursuant to the relevant Tranche Prospectus, depending on prevailing market conditions and other commercial considerations, in the ordinary course of business, our Company may retire some of its existing borrowings and may replace the same by way of issuance of commercial papers or draw upon existing Cash Credit facilities from Banks. Further, during this period, our Company may raise further debt (other than by way of issuance of debentures) in compliance with applicable law to meet ordinary business requirements. In case of any such further borrowing undertaken or retirement of its existing debt by our Company, during this period, the debt position of our Company, may undergo a change compared to the debt position as on September 30, 2016, as disclosed in this Shelf Prospectus.

C. Risks pertaining to this Issue

54. *If we do not generate adequate profits, we may not be able to maintain an adequate DRR for the NCDs issued pursuant to this Shelf Prospectus, which may have a bearing on the timely redemption of the NCDs by our Company.*

Regulation 16 of the SEBI Debt Regulations and Section 71 (4) of the Companies Act, 2013 states that where debentures are issued by any company, the company shall create a debenture redemption reserve out of the profits of the company available for payment of dividend. Rule 18 (7) of the Companies (Share Capital and Debentures) Rules, 2014, as amended, further states that for a HFC registered with NHB, 'the adequacy' of DRR shall be 25% of the value of outstanding debentures issued through a public issue as per the SEBI Debt Regulations. Accordingly, our Company is required to create a DRR of 25% of the value of the NCDs, outstanding as on date, issued through the Issue. In addition, as per Rule 18 (7) (e) under Chapter IV of the Companies Act, 2013, the amounts credited to DRR shall not be utilised by our Company except for the redemption of the NCDs. The Rules further mandate that every company required to maintain DRR shall deposit or invest, as the case may be, before the 30th day of April of each year a sum which shall not be less than 15% of the amount of its debentures maturing during the year ending on the 31st day of March of the next year in any one or more following methods: (a) in deposits with any scheduled bank, free from charge or lien; (b) in unencumbered securities of the Central Government or of any State Government; (c) in unencumbered securities mentioned in clauses (a) to (d) and (ee) of Section 20 of the Indian Trusts Act, 1882; (d) in unencumbered bonds issued by any other company which is notified under clause (f) of Section 20 of the Indian Trusts Act, 1882. The abovementioned amount deposited or invested, must not be utilized for any purpose other than for the repayment of debentures maturing during the year provided that the amount remaining deposited or invested must not at any time fall below 15% of the amount of debentures maturing during year ending on 31st day of March of that year. If we do not generate adequate profits, we may not be able to maintain an adequate DRR for the NCDs issued pursuant to this Shelf Prospectus, which may have a bearing on the timely redemption of the NCDs by our Company.

55. *Changes in interest rates may affect the price of our NCDs.*

All securities where a fixed rate of interest is offered, such as our NCDs, are subject to price risk issue. The price of such securities will vary inversely with changes in prevailing interest rates, i.e. when interest rates rise, prices of fixed income securities tend to fall and when interest rates drop, the prices tend to increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of prevailing interest rates. Increased rates of interest, which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our NCDs.

56. *You may not be able to recover, on a timely basis or at all, the full value of the outstanding amounts and/or the interest accrued thereon in connection with the NCDs.*

Our ability to pay interest accrued on the NCDs and/or the principal amount outstanding from time to time in connection therewith would be subject to various factors inter-alia including our financial condition, profitability and the general economic conditions in India and in the global financial markets. We cannot assure you that we would be able to repay the principal amount outstanding from time to time on the NCDs and/or the interest accrued thereon in a timely manner or at all. Although our Company will create appropriate security in favour of the Debenture Trustee for the NCD holders on the assets adequate to ensure minimum 100.00% asset cover for the NCDs, which

shall be free from any encumbrances, the realisable value of the assets charged as security, when liquidated, may be lower than the outstanding principal and/or interest accrued thereon in connection with the NCDs. A failure or delay to recover the expected value from a sale or disposition of the assets charged as security in connection with the NCDs could expose you to a potential loss.

57. There is no assurance that the NCDs issued pursuant to this Issue will be listed on Stock Exchanges in a timely manner, or at all.

In accordance with Indian law and practice, permissions for listing and trading of the NCDs issued pursuant to this Issue will not be granted until after the NCDs have been issued and Allotted. Approval for listing and trading will require all relevant documents to be submitted and carrying out of necessary procedures with the Stock Exchanges. There could be a failure or delay in listing the NCDs on the Stock Exchanges for reasons unforeseen. If permission to deal in and for an official quotation of the NCDs is not granted by the Stock Exchanges, our Company will forthwith repay, without interest, all monies received from the Applicants in accordance with prevailing law in this context, and pursuant to this Shelf Prospectus.

There is no assurance that the NCDs issued pursuant to this Issue will be listed on Stock Exchanges in a timely manner, or at all.

58. Our Company may raise further borrowings and charge its assets after receipt of necessary consents from its existing lenders.

Our Company may, subject to receipt of all necessary consents from its existing lenders and the Debenture Trustee to the Issue, raise further borrowings and charge its assets. Our Company is free to decide the nature of security that may be provided for future borrowings. In such a scenario, the NCD holders will rank pari passu with other charge holder and to that extent, may reduce the amounts recoverable by the NCD holders upon our Company's bankruptcy, winding-up or liquidation.

59. Payments to be made on the NCDs will be subordinated to certain tax and other liabilities preferred by law. In the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining to pay amounts due on the NCDs.

The NCDs will be subordinated to certain liabilities preferred by law such as the claims of the Government on account of taxes, and certain liabilities incurred in the ordinary course of our business. In particular, in the event of bankruptcy, liquidation or winding-up, our Company's assets will be available to pay obligations on the NCDs only after all of those liabilities that rank senior to these NCDs have been paid as per Section 327 of the Companies Act, 2013. In the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining to pay amounts due on the NCDs.

60. You may be subject to taxes arising on the sale of the NCDs.

Sales of NCDs by any holder may give rise to tax liability, as discussed in section titled '*Statement of Tax Benefits*' on page 46.

61. There may be no active market for the non convertible debentures on the WDM segment of the stock exchange. As a result, the liquidity and market prices of the non convertible debentures may fail to develop and may accordingly be adversely affected.

There can be no assurance that an active market for the NCDs will develop. If an active market for the NCDs fails to develop or be sustained, the liquidity and market prices of the NCDs may be adversely affected. The market price of the NCDs would depend on various factors inter alia including (i) the interest rate on similar securities available in the market and the general interest rate scenario in the country; (ii) the market for listed debt securities; (iii) general economic conditions; and (iv) our financial performance, growth prospects and results of operations. The aforementioned factors may adversely affect the liquidity and market price of the NCDs, which may trade at a discount to the price at which you purchase the NCDs and/or be relatively illiquid.

62. The fund requirement and deployment mentioned in the Objects of the Issue have not been appraised by any bank or financial institution

We intend to use the proceeds of the Issue, after meeting the expenditures of and related to the Issue, for the purpose

of onward lending, financing, and for repayment of interest and principal of existing borrowings of the Company. For further details, refer to the chapter “*Objects of the Issue*” on page 44. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. The management will have significant flexibility in applying the proceeds received by us from the Issue. Further, as per the provisions of the SEBI Debt Regulations, we are not required to appoint a monitoring agency and therefore no monitoring agency has been appointed for the Issue.

63. There may be a delay in making refund to Applicants.

We cannot assure you that the monies refundable to you, on account of (i) withdrawal of your applications, (ii) our failure to receive minimum subscription in connection with the Base Issue, (ii) withdrawal of the Issue, or (iii) failure to obtain the final approval from the Stock Exchanges for listing of the NCDs, will be refunded to you in a timely manner. We however, shall refund such monies, with the interest due and payable thereon as prescribed under applicable statutory and/or regulatory provisions.

A. IMPLICATIONS UNDER THE INCOME-TAX ACT, 1961

I. To the Resident Debenture Holder

1. Interest on NCD received by Debenture Holder(s) would be subject to tax at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act and such tax would need to be withheld at the time of credit/payment as per the provisions of Section 193 of the I.T. Act. However, no income tax is deductible at source in respect of the following:
 - (a) On any security issued by a company in a dematerialized form and is listed on any recognized stock exchange in India in accordance with the Securities Contracts (Regulation) Act, 1956 and the rules made there under (w.e.f. 01.06.2008).
 - (b) In case the payment of interest on debentures to a resident individual or a Hindu Undivided Family (HUF) Debenture Holder does not or is not likely to exceed ₹ 5,000 in the aggregate during the Financial Year and the interest is paid by an account payee cheque.
 - (c) When the Assessing Officer issues a certificate on an application by a Debenture Holder on satisfaction that the total income of the Debenture Holder justifies no/lower deduction of tax at source as per the provisions of Section 197(1) of the I.T. Act; and that certificate is filed with the Company before the prescribed date of closure of books for payment of debenture interest.
 - (d) (i) When the resident Debenture Holder with Permanent Account Number (PAN) (not being company or a firm) submits a declaration as per the provisions of section 197A(1A) of the I.T. Act in the prescribed Form 15G verified in the prescribed manner to the effect that the tax on his estimated total income of the financial year in which such income is to be included in computing his total income will be NIL. However under section 197A(1B) of the I.T. Act, Form 15G cannot be submitted nor considered for exemption from tax deduction at source if the dividend income referred to in section 194, interest on securities, interest, withdrawal from NSS and income from units of mutual fund or of Unit Trust of India as the case may be or the aggregate of the amounts of such incomes credited or paid or likely to be credited or paid during the previous year in which such income is to be included exceeds the maximum amount which is not chargeable to income tax.

To illustrate, as on 01.04.2016 -

- the maximum amount of income not chargeable to tax in case of individuals (other than senior citizens and super senior citizens) and HUFs is ₹ 2,50,000;
- in the case of every individual being a resident in India, who is of the age of 60 years or more but less than 80 years at any time during the Financial year (Senior Citizen) is ₹ 3,00,000; and
- in the case of every individual being a resident in India, who is of the age of 80 years or more at any time during the Financial year (Super Senior Citizen) is ₹ 5,00,000 for Financial Year 2016- 17.

Further, section 87A provides a rebate of 100 percent of income-tax or an amount

of ₹ 5,000 whichever is less to a resident individual whose total income does not exceed ₹ 500,000.

- (ii) Senior citizens, who are 60 or more years of age at any time during the financial year, enjoy the special privilege to submit a self-declaration in the prescribed Form 15H for non deduction of tax at source in accordance with the provisions of section 197A(1C) of the I.T. Act even if the aggregate income credited or paid or likely to be credited or paid exceeds the maximum amount not chargeable to tax, provided that the tax due on total income of the person is NIL.
 - (iii) In all other situations, tax would be deducted at source as per prevailing provisions of the I.T. Act. Form No.15G with PAN / Form No.15H with PAN / Certificate issued u/s 197(1) has to be filed with the Company before the prescribed date of closure of books for payment of debenture interest without any tax withholding.
2. In case where tax has to be deducted at source while paying debenture interest, the Company is not required to deduct surcharge, education cess and secondary and higher education cess.
 3. As per the provisions of section 2(29A) of the IT Act, read with section 2(42A) of the I.T. Act, a listed debenture is treated as a long term capital asset if the same is held for more than 12 months immediately preceding the date of its transfer.

As per section 112 of the I.T. Act, capital gains arising on the transfer of long term capital assets being listed securities are subject to tax at the rate of 20% of capital gains calculated after reducing indexed cost of acquisition or 10% of capital gains without indexation of the cost of acquisition. The capital gains will be computed by deducting expenditure incurred in connection with such transfer and cost of acquisition/indexed cost of acquisition of the debentures from the sale consideration.

However as per the third proviso to section 48 of I.T. Act, benefit of indexation of cost of acquisition under second proviso of section 48 of I.T. Act, is not available in case of bonds and debenture, except capital indexed bonds issued by the Government. Accordingly, long term capital gains arising to the Debenture Holder(s), would be subject to tax at the rate of 10%, computed without indexation, as the benefit of indexation of cost of acquisition is not available in case of debentures.

In case of an individual or HUF, being a resident, where the total income as reduced by such long-term capital gains is below the maximum amount which is not chargeable to income-tax, then, such long-term capital gains shall be reduced by the amount by which the total income as so reduced falls short of the maximum amount which is not chargeable to income-tax and the tax on the balance of such long-term capital gains shall be computed at the rate mentioned above.

4. Short-term capital gains on the transfer of listed debentures, where debentures are held for a period of not more than 12 months would be taxed at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act. The provisions relating to maximum amount not chargeable to tax described at para 3 above would also apply to such short term capital gains.
5. In case the debentures are held as stock in trade, the income on transfer of debentures would be taxed as business income or loss in accordance with and subject to the provisions of the I.T. Act. Further, where the debentures are sold by the Debenture Holder(s) before maturity, the gains arising there from are generally treated as capital gains or business income, as the case may be. However, there is an exposure that the Indian Revenue Authorities (especially at lower level) may seek to challenge the said characterisation (especially considering the provisions explained in Para V below) and hold such gains/income as interest income in the hands of such Debenture Holder(s). Further, cumulative or regular returns on debentures held till maturity would generally be taxable as interest income taxable under the head Income from other sources where debentures are held as investments or business income where debentures are held as trading asset / stock in trade.
6. As per Section 74 of the I.T. Act, short-term capital loss suffered during the year is allowed to be set-off against short-term as well as long-term capital gains of the said year. Balance loss, if any could be carried forward for eight years for claiming set-off against subsequent years short-term as

well as long-term capital gains. Long-term capital loss (other than the long-term capital assets whose gains are exempt under Section 10(38) of the I.T. Act) suffered during the year is allowed to be set-off only against long term capital gains. Balance loss, if any, could be carried forward for eight years for claiming set-off against subsequent years' long-term capital gains.

Act in accordance with and subject to the provisions contained therein.

Act, where a non-resident Indian becomes a resident in India in any subsequent year, he may furnish to the Assessing Officer a declaration in writing along with return of income under section 139 for the assessment year for which he is assessable as a resident, to the effect that the provisions of Chapter XII-A shall continue to apply to him in relation to the investment income (other than on shares in an Indian Company) derived from any foreign exchange assets in accordance with and subject to the provisions contained therein.  - (a) Long term capital gains on transfer of listed debentures would be subject to tax at the rate of 10% computed without indexation.
 - (b) Investment income and Short-term capital gains on the transfer of listed debentures, where debentures are held for a period of not more than 12 months preceding the date of transfer, would be taxed at the normal rates of tax in accordance with and subject to the provisions of the I.T. Act
3. Under Section 195 of the I.T. Act, the applicable rate of tax deduction at source is 20% on investment income and 10% on any long-term capital gains as per section 115E, and normal tax rates for Short Term Capital Gains if the payee Debenture Holder is a Non Resident Indian.
4. As per Section 74 of the I.T. Act, short-term capital loss suffered during the year is allowed to be set-off against short-term as well as long-term capital gains of the said year. Balance loss, if any could be carried forward for eight years for claiming set-off against subsequent years short-term as well as long-term capital gains. However, submission of Tax Residency Certificate (TRC) is a mandatory condition for availing benefits under any DTAA. Further, such non-resident investor would also be required to furnish Form 10F along-with TRC, if such TRC does not contain information prescribed by the CBDT vide its Notification No. 57/2013 dated 1 August 2013.

Where the benefit of section 54EC of the I.T. Act has been availed of on investments in the notified bonds, a deduction from the income with reference to such cost shall not be allowed under section 80C of the I.T. Act.

2. As per the provisions of section 54F of the I.T. Act, any long-term capital gains on transfer of a long term capital asset (not being residential house) arising to a Debenture Holder who is an individual or Hindu Undivided Family, is exempt from tax if the entire net sales consideration is utilized, within a period of one year before, or two years after the date of transfer, in purchase of a new residential house, or for construction of a residential house within three years from the date of transfer. If part of such net sales consideration is invested within the prescribed period in a residential house, then such gains would be chargeable to tax on a proportionate basis.

This exemption is available, subject to the condition that the Debenture Holder does not own more than one residential house at the time of such transfer. If the residential house in which the investment has been made is transferred within a period of three years from the date of its purchase or construction, the amount of capital gains tax exempted earlier would become chargeable to tax as long term capital gains in the year in which such residential house is transferred. Similarly, if the Debenture Holder purchases within a period of two years or constructs within a period of three years after the date of transfer of capital asset, another residential house (other than the new residential house referred above), then the original exemption will be taxed as capital gains in the year in which the additional residential house is acquired.

3. As per provisions of Section 54EE inserted by the Finance Act 2016, long term capital gains arising to the Debenture Holder(s) on transfer of their debentures in the company shall not be chargeable to tax to the extent such capital gains are invested in certain notified units within six months after the date of transfer. If only part of the capital gain is so invested, the exemption shall be proportionately reduced.

However, if the said notified units are transferred within a period of three years from their date of acquisition, the amount of capital gains exempted earlier would become chargeable to tax as long term capital gains in the year in which the units are transferred. Further, in case where loan or advance on the security of such notified units is availed, such notified units shall be deemed to have been transferred on the date on which loan or advance is taken. However, the amount of exemption with respect to the investment made in the aforesaid notified units during the financial year in which the debentures are transferred and the subsequent financial year, should not exceed ₹ 50 lakhs.

It was agreed that India will consider rescinding the said notification with effect from 1st November, 2013, and will be initiating the process for the same. Both sides expressed satisfaction with the progress achieved in the meeting, and hoped that it would lead to resolution of all pending matters at the earliest.

Overview of the Indian Economy

GDP and Disposable Income

India’s GDP will continue to expand at the fastest pace among major economies, with growth forecast at 7.6 percent in 2016–17. Large terms-of-trade gains, positive policy actions, structural reforms—including the introduction of an important tax reform and formalization of the inflation-targeting framework—and improved confidence are expected to support consumer demand and investment. Despite an overall slowdown in India's rate of GDP growth since 2011, per capita GDP in India nevertheless grew from an estimated US\$5,500 in 2013 to an estimated US\$6,300 in 2015. (Source: CIA Factbook) India's aggregate annual disposable income has been on the rise in recent years. The following graph illustrates the growth of India's aggregate annual disposable income from 2012 to 2016:

Investors' perceptions of India improved in early 2014, due to a reduction of the current account deficit and expectations of post-election economic reform, resulting in a surge of inbound capital flows and stabilization of the rupee. (Source: CIA Factbook) GDP growth picked up in the year 2014-2015, rising 7.3% on top of a growth of 6.9% in the year 2013-2014. The firming up of GDP growth in the year 2014-2015 was driven mainly by private consumption and supported by fixed investment, even as government consumption and net exports slackened considerably. Population

India had an estimated population of 1.251 billion in 2015. Approximately 67.3% and 32.7% of the entire population in India in 2015 lived in rural and urban areas, respectively. The estimated rate of urbanization in India is 2.38% between 2011 and 2015. (Source: CIA Factbook) The outlook for India's long-term growth is moderately positive due to a young population and corresponding low dependency ratio, healthy savings and investment rates, and increasing integration into the global economy. The median age of its population is only 27.3 years as of 2015. Indian Housing Finance Industry

Reserve Bank of India's (RBI) serious effort to contain inflation has given good reason for cheer to home buyers. Over last five years, the home loan rate has come down by almost 70 bps and the newly implemented marginal cost of funds-based lending rate (MCLR) system will also ensure rate cuts pass on to end-consumers. Lower interest rates will boost disbursements. Low interest rates and rising income levels will improve debt-servicing capability of buyers, making them eligible for higher loan amounts.

CRISIL Research expects overall disbursements to record 17-19% CAGR growth over next five years, supported by increase in loan-to-value (LTV) ratio and average ticket size. We expect housing financing companies (HFC)

to maintain their market share, even when banks turn aggressive, riding on HFCs' better data availability, greater focus on home loans, strong origination skills and relatively superior customer service.

Disbursement & outstanding growth

CRISIL Research expects home loan disbursements to record five-year CAGR of 17-19% to reach Rs 9.1 trillion by 2020-21, aided by higher finance penetration, higher loan ticket sizes and demand for affordable housing (Source: CRISIL Housing Finance Report, August 2016).

The following graph illustrates the growth of India's outstanding housing finance loans from the year 2011-2012 to the year 2019-2020:

Note: Data includes banks and HFCs, retail loans.

(Source: CRISIL Housing Finance Report, August 2016)

CRISIL Research expects the retail housing finance outstanding loan portfolio to expand at 19-21% CAGR over next two years (FY2015-16 to 2017-18), as disposable incomes rise, prices stabilise in major markets and interest rates decline. (Source: CRISIL Housing Finance Report, August 2016). CRISIL Research estimates that home loan disbursements by banks and housing finance companies (HFC) rose by close to 21% on-year in 2015-16. Demand for individual home loans went up despite high residential prices in major cities as consumer optimism increased post the general elections. Higher transaction volumes in Tier-II and Tier-III (non-metro) cities, growth in disposable income and fiscal incentives on housing loans along with more options in the affordable housing segment aided robust off-take. (Source: CRISIL Housing Finance Report, August 2016)

Note: Data includes banks and HFCs, retail loans.

(Source: CRISIL Housing Finance Report, August 2016)

India's mortgage-to-GDP ratio is still low at 10% in 2015-16 compared with other developing countries but it has improved from 7.4% in 2009-10 given rising incomes, improving affordability, growing urbanisation, including emergence of tier-II and tier-III cities, evolution of the nuclear family concept, ease of financing, tax incentives, and widening reach of financiers.

The following graph shows the mortgage penetration (as percentage of GDP) for certain countries:

Note: India data for FY16, Other countries data for CY14

(Source: **European Mortgage Federation, HOFINET, CRISIL Housing Finance Report, August 2016**)

Based on CRISIL Research's analysis, mortgage penetration levels in India are 9-11 years behind other regional emerging markets such as China and Thailand. However, due to various structural drivers such as a young population, smaller family sizes, urbanisation and rising income levels, it believes growth rates in the mortgage segment should remain healthy over the long term.

MCLR scheme will cap interest rate and improve disbursements

The Reserve Bank of India (RBI) has implemented the marginal cost of funds-based lending rate (MCLR) scheme effective from April 1, 2016 which forces banks and HFCs to pass the benefit of lower cost of borrowing to customers. Following that guideline, interest rates on home loans has come down by 10-15 bps from March 2016 to April 2016.

Amid rising gross income levels, declining interest rates will lower equated monthly installments (EMI) on home loans, making borrowers eligible for higher loan amounts. This will, in turn, enable buyers to purchase higher-priced homes or increase the loan-to-value (LTV) on loans, thereby enhancing average ticket size of home loan disbursements.

Thrust on affordable housing to boost disbursements

The recent push by the government to provide 'Housing for All' by 2022 and various steps taken to implement the same, are expected to boost sales of affordable and low-cost housing units and consequently, financing for the same. Some key steps taken by RBI:

- In December 2012, RBI had allowed housing finance companies (and real estate developers) who met certain criteria in terms of paid-up capital, net owned funds, non-performing assets, etc., to raise external commercial borrowings (ECB) to fund affordable housing projects.
- In June 2013, the RBI created a sub-category within the commercial real estate (CRE) segment - the residential housing (CRE-RH) segment, which includes loans to builders/developers. The new segment would be allocated lower risk weight of 75% for calculation of capital adequacy ratio (CAR) compared with 100% for the CRE segment.
- In July 2014, RBI permitted banks to raise long-term infrastructure bonds for funding affordable housing and infrastructure projects. These bonds would be exempt from mandatory norms such as cash reserve ratio and statutory liquidity ratio.
- In October 2015, RBI reduced risk weights applicable for affordable housing loans for CAR calculation. This is likely to lower capital requirements of financiers and lead to lower interest rates on these loans.

Housing Finance Companies

Housing finance is the second-largest loan portfolio for NBFCs after infrastructure. Several NBFCs have shifted focus to secured lending after the global slowdown in 2008-09, due to high delinquencies witnessed in the Un-Secured loan portfolio. This is evidenced by the formation of full-fledged housing finance divisions by a large number of players, between 2007 and 2009. Focus on secured assets (mortgage and loan against property (LAP)) helped de-risk loan books and resulted in continuous improvement in asset quality. The Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act (SARFAESI) also helped in securing loans in case of defaults.

Share of HFCs to remain steady over next two years

Banks currently have lion's share in housing loan outstanding (60% as of 2015-16). However, the share of HFCs has increased steadily from 39% to 40% over past three years. Even though HFCs are likely to get more aggressive, their share is likely to remain stable, as banks too have become aggressive in retail segment due to asset quality issues in corporate loans.

The following graph illustrates the market share of HFCs vs Banks in India's housing finance industry:

(Source: CRISIL Housing Finance Report, August 2016)

While banks have traditionally competed on interest rates, we believe that HFCs' specialised focus on home loans makes them attractive. Over past few years, robust growth in outstanding loans enabled HFCs to significantly enhance their market share. However, with the recent slowdown in corporate credit, banks are aggressively focusing and competing with HFCs; so, over next two years, we expect HFC and banks to register somewhat similar loan growth. (Source: CRISIL Housing Finance Report, August 2016)

(Source: CRISIL Housing Finance Report, August 2016)

However, with the recent slowdown in corporate credit, banks are aggressively focusing and competing with HFCs so, over next two years, CRISIL Research expects HFC and banks to register somewhat similar loan growth.

Recently, there have been concerns about the renewed aggression shown by banks in the home loan market given their aggressive pricing on the other hand, shows that room for banks to turn more aggressive on pricing without affecting profitability is limited. Moreover, with HFCs recently accessing non-bank sources of funds (along with easing of bond yields) their competitiveness on 'cost of funds' versus banks had improved. On non-pricing factors, CRISIL Research believes HFCs could continue to retain an upper hand given their specialisation. Thus, overall CRISIL Research believes HFCs would remain competitive in the mortgage market and the share is expected to remain stable. (Source: CRISIL Housing Finance Report, August 2016)

Most mid-size HFCs are increasing their focus on sub-Rs 2.5 million loans, as they are able to earn 150-200 basis points by selling their loan portfolio to banks (which helps banks meet their priority sector lending targets). Moreover, the sale of this loan portfolio takes place within a period of one year, which helps in resource mobilisation.

Geographic growth

Focus on Tier-II and Tier-III Cities and rural areas

Increase in finance penetration is also expected to support the industry's growth. Rising demand for housing from tier -II and tier-III cities, and subsequent surge in construction activity have resulted in greater focus of financiers on these geographies. Consequently, finance penetration in urban areas is estimated to have increased to 42.7% in 2015-16 from an estimated 39% in 2011-12 in urban areas, and to 8.95% from 8.20% during the same period in rural areas. Boosted by the affordable housing push and rising competition in higher ticket size loans, CRISIL Research expects finance penetration to increase to 44.5% in urban areas and to 9.4% in rural areas by 2017-18. Rural areas are also likely to witness considerable improvement in finance penetration, led by the government's efforts to provide housing for all. However, operational challenges such as timely collection of payments, lower ticket sizes and higher delinquencies in comparison with the urban markets will pose headwinds to rural expansion.

Profitability Analysis

HFCs' cost of funds is declining

HFCs do not have access to low-cost deposits, i.e., like CASA (current account savings account) deposits of banks; hence, their cost of funds is always higher than banks. HFCs also do not have the flexibility to transfer the increase in cost of funds to customers. Therefore, managing their cost of funds is vital for them to be competitive in this space.

Source: NHB, CRISIL Research, Company Report

Large HFCs have better access to the debt market, given their size and the parentage, making it easier for them to mobilise resources. But during a lower interest rate regime, where the difference between the bond yields and bank rate converges, these large HFCs could again increase their funding from banks.

On the other hand, mid-sized and small HFCs incur higher borrowing costs, given their limited ability to tap the bond market: These HFCs have greater reliance on bank borrowings and refinancing from NHB, which runs various schemes under which it refinances banks and HFCs. Most of these schemes are formulated to encourage lending in semi-urban and rural areas, and the periphery of urban areas where ticket sizes are generally low. Given the design of the schemes, mid-sized and small HFCs have been the disproportionate beneficiaries of low-cost funds released by NHB. Also, they aid in reducing asset-liability mismatches on their balance sheets and eventually reduce the cost of borrowings.

(Source: CRISIL Housing Finance Report, August 2016)

CRISIL Research believes that the players' access to funds will improve, as the government and the RBI have announced several measures to ensure adequate funding. Also, the new MCLR scheme has clearly reduced the borrowing costs. CRISIL Research has seen that the bank borrowing for housing loans has declined by 10-15 bps, since the banks have adopted the new MCLR scheme from the previous base-rate system. It is important to note that over the past few years, players too have begun to adjust their funding mix in a proportion that optimises costs.

Return on assets to remain range bound

Return on assets (RoAs), an indicator of financial performance, has remained stable during 2015-16 after the lackluster performance in 2014-15. The RoAs of mid-sized and small companies are lower due to their higher operating cost (as they are aggressively increasing their reach in tier-II and tier-III cities) and higher credit cost. On the other hand, large HFCs are better in terms of expenses management. In the cut-throat competition to gain customers, these HFCs are either waiving off the processing fee or charging a minuscule fee, resulting in lower fee income. CRISIL Research expects the RoA for mid and small HFCs to remain range bound in 2016-17 and 2017-18, as financiers are incurring higher operating and stable credit costs. Also as HFCs are acquainting themselves with better technology and are following a stringent credit monitoring system, this will protect any downside in their profitability.

Asset quality in housing loan portfolio to show marginally uptick in next two-years

As demand for home loans largely comes from first-time buyers, asset quality in this segment has remained low historically. Non-performing assets (NPAs) of financiers improved in last two-years because of adequate appraisal systems and effective recovery mechanisms as well as better availability of information (CIBIL data). However, seasoning in the portfolios of rapidly growing HFCs, many of which are focused on the self-employed customers, there could be an increase in delinquencies in that segment. Asset quality in non-individual segment will also need to be closely monitored, given the pressure on real-estate developers. NPAs are likely to show marginal uptick but remain healthy over the next two-years but expected to decline in long-term, led by economic recovery, lower interest rates, better control, system checks, follow-ups and an expected improvement in job security. The following graph illustrates the group wise asset quality:

(Source: CRISIL Housing Finance Report, August 2016)

Market Trends

MCLR regime to keep home loan rates in the sweet spot for the next two years

The introduction of marginal cost of fund-based lending rate (MCLR) scheme has ensured that the lenders pass on the rate-cut benefit to consumers. Since the implementation of the scheme (on April 1, 2016), CRISIL Research believes it has seen that the average interest rate on housing loans has come down by 10-15 bps until June 2016, and CRISIL Research expects this trend to continue, as banks pass on the benefit from repricing their deposits. CRISIL Research expects a 25 bps further rate cut by the Reserve Bank of India (RBI) in this fiscal year; the rate cut will have a substantial effect on lending rates.

Average home loan rate

(Source: CRISIL Housing Finance Report, August 2016)

Share of floating interest rate loans to increase

Financiers offer two types of home loans to customers - fixed rate and floating rate. Fixed rate loans are typically priced higher than floating rate loans, due to the higher interest rate risk. Given the long-term nature of housing loans and medium-term nature of the financiers' liabilities, financiers prefer to lend at floating rates, as it allows them to reset interest rates when their cost of funds increases.

The proportion of floating rate loans has been increasing since 2005-06, primarily due to an indirect push from financiers by way of higher spreads between fixed rate loans and floating rate loans; in some cases, the spread was as wide as 275 bps. After 2009-10, despite rising interest rates, borrowers opted for floating rate loans in anticipation of a reduction/stabilisation of rates in the later years. With the interest rate cycle on a downtrend, and expectations of a further softening, CRISIL Research expects the proportion of floating interest rate loans to inch up.

Average contractual tenure of loans is rising

The average contractual tenure of home loans is projected to increase to 185 months by 2020-21, from the current 180 months. With the rise in property prices and the declining average age of borrowers, financiers have the comfort of increasing the loan tenures.

Average age of borrowers to continue to decline

The average age of the borrower has been declining over the years and was estimated at 33-35 years in 2015-16. CRISIL Research expects the average age of the borrower to decline further, encouraged by growth in salaries, people's growing preference for accumulating assets as a means of investment and for tax benefits.

A large proportion of home loan borrowers belong to the salaried class. Between 1999-2000 and 2007-08, salaries are estimated to have increased at a higher rate than the rise in property prices, thereby increasing the affordability of new houses for individuals. Also, the growth rate in salaries has been higher for those in the younger age bracket than those who are close to retirement. This trend, coupled with tax incentives for interest and principal repayments, has prompted more young people to buy houses.

Key Growth Drivers for Housing Finance Industry

Higher ticket size of loans

As urban property prices rose rapidly over the years, the average ticket size for loans disbursed by housing finance companies also increased, fueling growth of the sector. In 2015-16, it is estimated that the average ticket size of loans grew 7-8% to Rs 2.24 million. While property prices in Mumbai, Hyderabad and Chandigarh stabilised, increasing urbanisation is pushing up prices in tier-II and tier-III cities.

Note: For the calculation of average ticket size aggregate financials of Housing Development Finance Corporation Limited, LIC Housing Finance Limited, Dewan Housing Finance Corporation Limited, Indiabulls Housing Finance Limited, REPCO Home Finance and Gruh Finance are considered

Urbanization

Despite a flourishing housing industry, India still faces a huge shortage of houses, especially in urban areas. The share of urban population rose steadily from 28.8% in 2004 to 31.8% in 2014. Though overall population growth slowed, urban population recorded a 2.8% CAGR over 2001 to 2011. CRISIL Research expects urbanisation to accelerate, translating into a CAGR of 2.0-2.5% in urban population between 2016 and 2021, compared with the overall population growth of 1.2% during the same period. This difference in growth rates implies the gap between urban and rural population will narrow.

Urbanisation has a twin impact on housing demand. On one side, it reduces the area per household, and on the other, there is a rise in the number of nuclear families, leading to the formation of more households.

Rise in finance penetration to drive the industry

An increase in finance penetration is also expected to support the industry's growth. Rising demand for housing from tier-II and tier-III cities, and a subsequent surge in construction activity, have increased the focus of financiers on these geographies. Consequently, finance penetration in urban areas is estimated to have increased to 42.7% in 2015-16 from an estimated 39% in 2011-12.

Finance penetration in rural areas is estimated to have risen only slightly to 8.95% in 2015-16 from 8.20% in 2011-12. Boosted by the affordable housing push and rising competition in higher ticket size loans, CRISIL Research expects finance penetration to increase to 44.5% in urban areas and to 9.4% in rural areas by 2017-18.

Rural areas are also likely to witness considerable improvement in finance penetration, led by the government's efforts to provide housing for all. However, operational challenges, such as timely collection of payments, lower ticket sizes and higher delinquencies in comparison with the urban markets will pose headwinds to rural expansion.

This scheme of the Govt. of India has sought to create an enabling and supportive environment for expanding credit flow and increasing home ownership in India and has introduced Credit Linked Subsidy Scheme (‘CLSS’) whose target group, is low-income group (LIG) and economically weaker sections (EWS) segments. The scheme provides for a subsidy element for economically weaker sections EWS and LIG individuals who were keen to purchase homes or flats for the first time and having an annual income of ₹ 3.00 lakh and ₹ 6.00 lakh, respectively. Further the Real Estate Regulation Authority bill to ensure transparency and accountability of all involved parties has been a great booster to Indian buyers. This affordable Housing segment has generated interest in most of the HFCs including our Company. We have launched various innovative products to capture larger share in low income group segment including the Star Home Loan to LIG salaried and self-employed segment.

Risk Management

Our Company operates in dynamic environment, and given the markets we operate in, elements of risk are inherent. The Board of the Company recognizes the importance of identifying and controlling risks and ensuring that required internal controls and procedures have been established which are designed to safeguard assets and interests of the company, and ensuring the integrity of reporting. Risk management policy of the company facilitates proactive risk management, enhance understanding of all risks faced by our Company, facilitate the prioritization of risks and enhance the effectiveness of risk management activities.

Our Board of Directors has the responsibility for overseeing all risks associated with the activities of business, establish a strong internal control environment and risk framework that fulfils the expectations of stakeholders. Our Company has also established a Risk Management Committee to assist the Board in ensuring that appropriate risk management and internal control system is in place and for regularly reviewing the effectiveness of same. The Risk Management Committee consists of Mr. K. V. Srinivasan, Director, Mr. Ravindra Sudhalkar, CEO, Mr. Sandip Parikh, Mr. Krishnan Gopalakrishnan and Mr. Rajesh Ganorkar. Our Company has framed the risk assessment and minimization procedure which is periodically reviewed by the Audit Committee and the Board. Risk Management Committee is responsible for monitoring the adherence to the risk policy and guidelines and reviewing the overall risk management system in light of changes in external and internal environment within which the Company operates. The Risk Management Committee meets on periodic (quarterly) basis.

Key risk categories for which Company would have policies & procedures in place include:

- Credit Risk
- Market Risk
- Operational Risk
- Fraud Risk
- Legal and Compliance Risk

Risk management process endeavours to identify, assess, monitor and report the risks in terms of above categories with any significant risk being reported to Risk Committee. Since the internal and external environment within which the Company operates is exposed to change continuously, the risk management process is kept sufficiently flexible to accommodate new situations as they arise.

For further details on the risk associated with our Risk Management operations, please refer to the chapter titled “**Risk Factors**” on page 11.

Over the last few years, Indian financial markets have witnessed wide-ranging changes. Greater competition has encouraged HFCs to develop new financial products and services. Interest rate structure has become more complex. Further, products like Interest Rate Swaps, Forward Rate Agreements etc. to hedge interest rate risk and change the profiles of assets and liabilities from fixed to floating and vice versa have become common in the market. These

products have therefore given flexibility to HFCs to manage their assets and liabilities as per their interest rate view and alter their risk profile to better match their corporate objectives.

Our strategy aims to attain a structured Asset Liability Management (ALM) system in the Company with a view to managing for the time being, Liquidity Risk and Interest Rate Risk and eventually supplement all areas of Enterprise-wide Risk Management.

ALM Committee, known as ALCO, is primarily responsible for ALM process in the Company. The functioning of ALCO is overseen by the Risk Management Committee. The important decisions taken by ALCO are placed before RMC. ALCO consisting of senior management personnel is formed and is the decision making unit responsible for strategic management of interest rate and liquidity risks besides balance sheet planning. NHB has given discretion to respective HFCs to decide the composition of the Committee and the frequency of the meetings.

Interest Rate Committee supplements the ALCO in decisions regarding the product wise interest structures, special occasion offerings, Limited period offerings etc. The decisions take at such IRC are reviewed at the ALCO meetings.

Interest rate risk management

Reliance Home Finance is exposed to Interest Rate fluctuations in the market as borrowing rates for Bank Borrowings are linked to the marginal cost lending rates (MCLR)/ base rate and this rate keeps changing. Our business which has majority loans in floating rates are re-priced as and when the need arises which is primarily driven by the borrowing rate changes. Interest rate gap analysis is done at periodic basis by classifying all assets and liabilities into various time buckets according to projected re-pricing date. As there would be always couple of months lagging period for any change of floating interest rate on lending to the borrowers arising out of change in interest rate on borrowing, no negative limit is prescribed for period up to 2 months.

These limits are subjected to annual review. However, the Board has the discretion to review the same at a shorter duration as and when felt necessary or as may be recommended by the ALCO.

As at September 30, 2016 and March 31, 2016, 97.10% and 98.50% of our assets were floating rate loans and 64.01% and 81.70% of our liabilities were floating rate borrowings, respectively.

Interest Rate Committee meeting is held every month to discuss on the interest rate scenario in the market, regulators view on the inflation management and decide on the product pricing so as to maintain the budgeted yield.

Monthly Portfolio Risk Reviews are conducted for each retail and non-retail product portfolio to monitor the performance of the Portfolio and suggest measures for improvement, including reduction in exposure to certain sector to tolerable limits. Asset verification is carried out on a sample basis to confirm the end use of the loan facility as well as existence of the collateral security. Based on this, customers are classified in different risk categories (High Risk / Watch List / Safe) and appropriate remedial actions are initiated.

The Company has a robust risk reporting framework, which includes reports presented to the board and senior management and compliance with prudential norms, capital position, provisioning, quality of exposures, etc. and reports as per the regulatory guidelines

The Company has an Independent Risk Containment Unit which specialises in identifying fraudulent cases coming in the system and hence detect them at an early stage.

Operational risk (OR) arises due to a wide range of different external events ranging from power failures to floods or earthquakes to terrorist attacks. The important decisions taken in the ORMC are placed before RMC.

Identification and self-assessment of risks is performed using the scale of probability and impact and assessing the vulnerability of the control environment.
- The Company as a part of its corporate risk management initiative has a Business Continuity Management System (BCMS) framework enabling it to proactively identify any disruptive events which may cause non-availability of its key products and services and thereby put in place controls to mitigate the impact of such events. Business Impact assessments should be carried out to identify process criticality, point of impact and accordingly design the business continuity strategies.

Disaster recovery (DR) and Business Continuity Plans (BCP) are periodically tested and reviewed to ensure their effectiveness to mitigate unforeseen risks arising out of disruptions.

The NHB has amended the provisioning norms in the NHB Directions, 2010, pursuant to the notification no. NHB.HFC.DIR.3/CMD/2011 dated August 5, 2011, as further amended by NHB *vide* notification no. NHB.HFC.DIR.4/CMD/2012 dated January 19, 2012, as amended by notification no. NHB.HFC.DIR.9/CMD/2013 dated September 6, 2013 and included in the Master Circular - The Housing Finance Companies (NHB) Directions, 2010 dated September 9, 2015. Such projects do not include non-residential commercial real estate. However, integrated housing projects comprising of some commercial space (e.g. shopping complex, school etc.) can be classified as CRE-RH, provided that the commercial space in the residential housing project does not exceed 10% of the total floor space index (“FSI”) of the project. In case the FSI of the commercial area in a predominantly residential housing complex exceeds the ceiling of the project loans, the entire loan should be classified as CRE (and not CRE-RH) - provision of 0.75% on the total outstanding amount of such loans; (ii) (b) standard assets in respect of all other Commercial Real Estates (“CRE”) (consisting of loans to builders/developers/others for office buildings, retail space, multipurpose commercial premises multi-tenanted commercial premises, industrial or warehouse space, hotels, land acquisition, development and construction etc., other than those

Under the NHB Directions, 2010, degrees of credit risk expressed as percentage weighting have been assigned to balance sheet assets. Hence, the face value of each asset is multiplied by the relevant risk weights to arrive at its risk adjusted value of the asset. The aggregate shall be taken into account for calculating the minimum capital adequacy ratio of a housing finance institution.

Further, in terms of the NHB Directions, 2010, no HFC shall invest in land or buildings, except for its own use, an amount exceeding 20% of its capital fund (aggregate of Tier I capital and Tier II capital). Within this overall ceiling, direct investment in shares, convertible bonds, debentures, units of equity-oriented mutual funds and all exposures to venture capital funds should not exceed 20% of its net worth.

Thus, in the case of a dual/special rate housing loans, the pre-closure norm for floating rate will be applicable once the loan has been converted into floating rate loan, after the expiry of the fixed interest rate period. This shall be applicable to all such dual/special rate housing loans being foreclosed hereafter. Further NHB (ND)/DRS/Policy Circular No. 63/2014-15 dated August 14, 2014 directed that HFCs shall not charge foreclosure charges/pre-payment penalties on all floating rate term loans sanctioned to individual borrowers, with immediate effect. The Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 (the “**SARFAESI Act**”) regulates the securitization and reconstruction of financial assets of banks and financial institutions. The SARFAESI Act provides for measures in relation to enforcement of security interests and rights of the secured creditor in case of default.

The RBI has issued guidelines to banks and financial institutions on the process to be followed for sales of financial assets to asset reconstruction companies. These guidelines provide that a bank or a financial institution may sell financial assets to an asset reconstruction company provided the asset is a NPA. A bank or financial institution may sell financial assets only if the borrower has a consortium or multiple banking arrangements and

at least 75% by value of the total loans to the borrower are classified as a NPA and at least 75% by the value of the banks and financial institutions in the consortium or multiple banking arrangement agree to the sale. These assets are to be sold on a “without recourse” basis only.

The SARFAESI Act provides for the acquisition of financial assets by securitisation company or reconstruction company from any bank or financial institution on such terms and conditions as may be agreed upon between them. A securitization company or reconstruction company having regard to the guidelines framed by the RBI may, for the purposes of asset reconstruction, provide for measures such as the proper management of the business of the borrower by change in or takeover of the management of the business of the borrower, the sale or lease of a part or whole of the business of the borrower and certain other measures such as rescheduling of payment of debts payable by the borrower and enforcement of security.

Guidelines for Asset Liability Management System for HFCs *vide* circular NHB/ND/DRS/Pol-No. 35/2010-11 dated October 11, 2010

NHB has since revised the guidelines. The revised guidelines would be applicable to all HFCs irrespective of whether they are accepting/holding public deposits or not. The ALM Guidelines for HFCs lays down broad guidelines for HFCs in respect of systems for management of liquidity and interest rate risks. The ALM Guidelines provide that the board of directors of a HFC should have overall responsibility for management of risks and should decide the risk management policy and set limits for liquidity, interest rate, exchange rate and equity price risks. Additionally, an asset-liability committee is required to be constituted consisting of the HFC’s senior management including the chief executive officer for ensuring adherence to the limits set by the board as well as for deciding the business strategy of the HFC (on the assets and liabilities sides) in line with the HFC’s budget and decided risk management objectives. Asset-liability management support groups to be constituted of operating staff are required to be responsible for analysing, monitoring and reporting the risk profiles to the asset-liability committee.

The ALM Guidelines also recommended classification of various components of assets and liabilities into different time buckets for preparation of gap reports (liquidity and interest rate sensitive). The gap is the difference between rate sensitive assets and rate sensitive liabilities for each time bucket. In accordance with the ALM Guidelines, HFCs which are better equipped to reasonably estimate the behavioural pattern of various components of assets and liabilities on the basis of past data/empirical studies could classify them in the appropriate time buckets, subject to approval by the asset-liability committee/board of the HFC.

Further, the HFCs are required to disclose information on interest rates, common fees and charges through notices etc. HFCs are required to ensure that all advertising and promotional material is clear and not misleading and that privacy and confidentiality of the customers' information is maintained. Further, whenever loans are given, HFCs should explain to the customer the repayment process by way of amount, tenure and periodicity of repayment. However, if the customer does not adhere to repayment schedule, a defined process in accordance with the laws of the land shall be followed for recovery of dues. The process will involve reminding the customer by sending him/her notice or by making personal visits and/or repossession of security, if any.

HFCs are required to ensure that the recovery agents are properly trained to handle with care and sensitivity their responsibilities, in particular, aspects like hours of calling and privacy of customer information, among others. HFCs are also required to inform the borrower of the details of recovery agency firms/companies while forwarding default cases to the recovery agency.

Under the Recovery Agents Guidelines, any person authorized to represent a HFC in collection and/or security repossession should follow guidelines which includes inter-alia contacting the customer ordinarily at the place of his/her choice; interaction with the customer in a civil manner and assistance to resolve disputes or differences regarding dues in a mutually acceptable and orderly manner. Each HFC should have a mechanism whereby the borrower's grievances with regard to the recovery process can be addressed. The details of the mechanism should also be furnished to the borrower. HFCs have been advised to constitute grievance redressal machinery within the company and give wide publicity about it through electronic and print media.

HFCs are required to, at least on an annual basis, review the financial and operational condition of the service providers to assess their ability to continue to meet their outsourcing obligations. Such due diligence reviews, which can be based on all available information about the service provider, should highlight any deterioration or breach in performance standards, confidentiality and security, and in business continuity preparedness.

In India, corporate insolvency proceedings are currently governed by multifarious legislations such as the Companies Act, SARFAESI Act 2002, Recovery of Debts due to Banks and Financial Institutions Act, 1993, Sick Industrial Companies Act, 1985 etc. However, a new Insolvency and Bankruptcy Bill, 2015 (the “**Bankruptcy Code**”) has been passed by the Indian Parliament and has received the assent of the President of India on May 28, 2016, and notified in the gazette of India soon after. If the resolution process fails, the company goes into liquidation. Once the Bankruptcy Code is approved and notified as effective, the relevant provisions of the Companies Act, the Recovery of Debts due to Banks and Financial Institutions Act, 1993, the Sick Industrial Companies Act, 1985 will be amended accordingly. Pursuant to these amendments, all the recovery proceedings under each of these acts shall be streamlined and governed under the provisions of Bankruptcy Code.

Independent Auditors' Review Report

To
The Board of Directors of
Reliance Home Finance Limited

We have reviewed the accompanying statement of unaudited financial results of **Reliance Home Finance Limited** ('the Company') for the six months ended September 30, 2016. This statement is the responsibility of the Company's Management and has been approved by the Board of Directors. Our responsibility is to issue a report on these financial results based on our review.

We conducted our review in accordance with the Standard on Review Engagement (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to inquiries of Company personnel and analytical procedures applied to financial data and thus provide less assurance than an audit. We have not performed an audit and accordingly, we do not express an audit opinion.

Based on our review conducted as above, nothing has come to our notice that causes us to believe that the accompanying statement of unaudited financial results prepared in accordance with the Accounting Standards notified under Section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014 and other recognised accounting practices and policies, has not disclosed the information required to be disclosed in terms of Regulation 52 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, including the manner in which it is to be disclosed, or that it contains any material misstatement or that it has not been prepared in accordance with the relevant prudential norms issued by the National Housing Bank in respect of income recognition, asset classification, provisioning and other related matters.

The present value of the obligation under such defined benefit plan is determined based on actuarial valuation using the Projected unit Credit Method, which recognises each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plan, are based on the market yields on Government securities as on the balance sheet date.

Actuarial gains and losses are recognised immediately in the Statement of Profit and Loss.

As a long term incentive plan to employees, the Company has initiated Phantom Stock Option plan which are cash settlement rights where the employees are entitled to get cash compensation based on formula linked to fair market value of shares upon exercise of phantom stock option over notional or hypothetical shares, whereby instead of becoming entitled to buy the actual shares on vesting, they become entitled to cash payment equivalent to appreciation in the value over defined base price of share. The present value of the obligation under such plan is determined based on actuarial valuation at the year end and any actuarial gains/ losses are charged to statement of profit and loss as applicable.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2016

n Borrowing costs

Borrowing costs, which are directly attributable to the acquisition / construction of fixed assets, till the time such assets are ready for intended use, are capitalised as part of the cost of the assets. Other borrowing costs are recognised as an expense in the year in which they are incurred. Brokerage costs directly attributable to a borrowing are expensed over the tenure of the borrowing.

o Guarantee Fees

Mortgage guarantee fees, which are directly attributable to the loans guaranteed are expensed based on the principal outstanding at the end of the period.

p Earnings per share

The basic earnings per share is computed by dividing the net profit / (loss) attributable to the equity shareholders for the period by the weighted average number of equity shares outstanding during the reporting period. The number of shares used in computing diluted earnings per share comprises the weighted average number of shares considered for deriving earnings per share, and also the number of equity shares, which could have been issued on the conversion of all dilutive potential shares. In computing dilutive earnings per share, only potential equity shares that are dilutive and that reduce profit / (loss) per share are included.

q Provision for Current Tax and Deferred Tax

Income tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the income tax law) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the period).

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is virtual certainty of realisation of such assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realised.

r Impairment of Assets

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired, if such condition exists an asset is treated as impaired, when carrying cost of assets exceeds its recoverable amount. An impairment loss is charged to the Statement of Profit and Loss in the year in which an asset is identified as impaired. The impairment loss recognised in prior accounting periods is reversed if there has been a change in the estimate of the recoverable amount is treated as impaired, when carrying cost of assets exceeds its recoverable amount.

s Provisions, Contingent Liabilities and Contingent Assets

The Company creates a provision when there is a present obligation as a result of past events and it is probable that there will be outflow of resources and a reliable estimate of the obligation can be made of the amount of the obligation.

Contingent liabilities are not recognised but are disclosed in the notes to the financial statements. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that the outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are not recognised nor disclosed in the financial statements.

The present value of the obligation under such defined benefit plan is determined based on actuarial valuation using the Projected unit Credit Method, which recognises each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plan, are based on the market yields on Government securities as on the balance sheet date.

Actuarial gains and losses are recognised immediately in the Statement of Profit and Loss.

Actuarial gains and losses are recognised immediately in the statement of profit and Loss.

iii) Leave Encashment

Leave encashment which is a defined benefit, is accrued for based on an actuarial valuation at the balance sheet date carried out by an independent actuary.

The employees of the Company are entitled for compensated absence. The employees can carry forward a portion of the unutilised accrued leave balance and utilise it in future periods. The Company records an obligation for compensated absences in the period in which the employee renders the service that increases the entitlement. The Company measures the expected cost of compensated absence as the amount that the Company expects to pay as a result of the unused entitlement that has accumulated at the balance sheet date.

k Borrowing costs

Borrowing costs, which are directly attributable to the acquisition / construction of fixed assets, till the time such assets are ready for intended use, are capitalised as part of the cost of the assets. Other borrowing costs are recognised as an expense in the year in which they are incurred. Brokerage costs directly attributable to a borrowing are expensed over the tenure of the borrowing.

l Earnings per share

The basic earnings per share is computed by dividing the net profit / (loss) attributable to the equity shareholders for the period by the weighted average number of equity shares outstanding during the reporting period. The number of shares used in computing diluted earnings per share comprises the weighted average number of shares considered for deriving earnings per share, and also the number of equity shares, which could have been issued on the conversion of all dilutive potential shares. In computing dilutive earnings per share, only potential equity shares that are dilutive and that reduce profit / (loss) per share are included.

m Provision for Current Tax and Deferred Tax

Income tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the income tax law) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the period).

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is virtual certainty of realisation of such assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realised.

n Impairment of Assets

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired, if such condition exists an asset is treated as impaired, when carrying cost of assets exceeds its recoverable amount. An impairment loss is charged to the Statement of Profit and Loss in the year in which an asset is identified as impaired. The impairment loss recognised in prior accounting periods is reversed if there has been a change in the estimate of the recoverable amount is treated as impaired, when carrying cost of assets exceeds its recoverable amount.

o Securitised Assets

Under the mortgage loan agreements, the Respondents were to repay both the loan amounts within a period of 144 months with interest at the rate of 14% per annum. The Respondents has defaulted in the repayment of the loan instalments as required under the loan agreements, pursuant to which our Company had terminated the loan agreements and called upon the Respondents to pay ₹ 378.39 lakhs and ₹ 699.92 lakhs payable under the mortgage loan agreement. In accordance with Clause 17 of the mortgage loan agreements, disputes arising thereunder were to be referred to arbitration in Mumbai, however, to prevent any alienation or creation of third party rights over the mortgaged properties between the reference to arbitration and the passing of the final arbitral award, our Company filed this arbitration petition praying inter alia for the court to grant the following ad-interim reliefs : (i) order the appointment of a receiver to take possession of and hand over the mortgaged properties to our Company and allow sale by private contract; (ii) permit the receiver to take forcible possession of the mortgaged properties; (iii) direct the Respondents to disclose all properties held by them (the “**disclosed properties**”), and prevent the Respondents from parting with possession, creating third party rights, alienating or encumbering the mortgaged properties or any disclosed properties pending the hearing and final disposal of the arbitral proceedings; and (iv) direct the Respondents to deposit a sum of and furnish a bank guarantee of ₹ 373.80 lakhs and ₹ 693.58 lakhs as on May 12, 2016, with further overdue compensation at the rate of 3% per month from May 13, 2016; and grant costs in relation to this petition, to secure the claim of our Company. The matter is currently pending.

Litigation involving our Group Companies

1. Reliance Infocomm Infrastructure Limited ("**RIIL**") filed Writ Petition No. 4855/2015 before the Bombay High Court against the impugned demand of ₹ 1,184 crores by Maharashtra State Electricity Distribution Company Limited for differential electricity charges raised for the MBP office vide order dated April 24, 2015. On May 22, 2015, the Bombay High Court has directed RIIL to deposit 50% of the said demand with the Registry and seek alternate remedy by way of filing an appeal. The same was challenged by the RIIL in the Supreme Court, but no relief was granted. Hence, appropriate civil application was filed in Bombay High Court seeking protection and same has been granted on condition that RIIL has to deposit ₹ 200 crores in the Court. RIIL deposited the said amount. Matter is currently pending admission.

Litigations involving our Directors

2. The Securities and Exchange Board of India ("**SEBI**") had passed an order dated September 29, 2015 against *inter alia* Ms. Deena Mehta ("**Director**"), an Independent Director of our Company, under Section 15H (ii) of the Securities and Exchange Board of India Act, 1992 ("**SEBI Act**"), whereby the respondents in the said order, including the Director (collectively, the "**Respondents**"), were order to pay a penalty of ₹ 25,00,000 for acquisition of shares in a company promoted by one of the Respondents without public announcement, pursuant to showcause notice dated July 7, 2014. The Respondents filed appeal No. 490 of 2015 before the Securities and Appellate Tribunal ("**SAT**") challenging the said order of SEBI. SAT in its order dated March 21, 2016 quashed the said order of SEBI and restored the file to SEBI for fresh order on merits and in accordance with law.
3. On October 22, 2011, the Special Judge, CBI framed charges against *inter alia* Mr. Gautam Doshi and certain Reliance and non-Reliance Group persons for various offences, including criminal breach of trust, criminal conspiracy, forgery, giving false evidence, abetment of corruption of a public servant and abetment of an offence under Sections 109, 120B, 193, 409, 420, 468, 471 of the IPC, or in the alternative, Sections 11, 12 and 13(2) read with 13(1)(d) of the Prevention of Corruption Act, 1988, *inter alia* in relation to award of the Unified Access Services License ("**UASL**") to Swan Telecom Private Limited, now known as Etisalat DB Private Limited ("**Swan**"). It is alleged that Swan was ineligible to be granted a UASL as Reliance Telecom Limited ("**Reliance Telecom**"), directly as well as through its associates, was holding securities in Swan in excess of the prescribed limits. Clause 8 of the UASL agreement stated that no single person could directly or indirectly hold 10% or more of more than one licensee in the same service area for the same service. Reliance Telecom and the other accused contended that Reliance Telecom had held securities within the prescribed limits in Swan when Swan had applied for the UASL but had not acquired the UASL and before the grant of UASL to SWAN in 2007 Reliance Telecom sold the securities it held in Swan. The matter is pending before the Special Judge, CBI. The Supreme Court has granted bail to Mr. Doshi on November 24, 2011.

Further, Article 5A states that the company may declare and / or pay dividends on any of its share capital.

the amount paid and the amount, if any, unpaid on each reduced share shall be the same as it was in the case of the share from which the reduced share is derived; and (e) cancel shares which, at the date of the passing of the resolution in that behalf, have not been taken or agreed to be taken by any person, and diminish the amount of its share capital by the amount of the shares so cancelled.

Unless otherwise agreed, the registration of a transfer of shares shall operate as a waiver of the Company's lien, if any, on such shares.

Article 34 states that subject to the provisions of Section 108 of the Act, the Company shall not register a transfer of shares unless a proper instrument of transfer duly stamped and executed by or on behalf of the transferor and by or on behalf of the transferee has been delivered to the Company within the period specified in Section 108 of the Act, specifying the name, address and occupation if any of the transferee together with the share certificate relating to the shares or, if no such certificate is in existence, the letter of allotment of the shares and such other evidence as the Board may require to prove the title of the transferor or his right to transfer the shares, provided that where on any application in writing made to the Company by the transferee it is proved to the satisfaction of the Board that the instrument of transfer signed by or on behalf of the transferor and by or on behalf of the transferee has been lost, the Company may register the transfer on such terms as to indemnity as the Board may think fit.

Article 39(3) states that notwithstanding anything contained in any other law for the time being in force or in any disposition, whether testamentary or otherwise, in respect of such shares in or debentures of the Company, where a nomination made in the prescribed manner purports to confer on any person the right to vest the shares in or debentures of the Company, the nominee shall, on the death of the shareholder or debenture holder or, as the case may be, on the death of the joint holders, become entitled to all the rights in such shares or debentures, to the exclusion of all other persons, unless the nomination is varied, cancelled in the prescribed manner.

Article 39(5) also states that a nominee, upon production of such evidence as may be required by the Board and subject as hereinafter provided, elect, either: (a) to be registered himself as holder of the share or debenture, as the case may be; or (b) to make such transfer of the share or debenture, as the case may be, as the deceased

shareholder or debenture holder, could have made; (c) if the nominee elects to be registered as holder of the share or debenture, himself as the case may be, he shall deliver or send to the Company, a notice in writing signed by him stating that he so elects and such notice shall be accompanied with the death certificate of the deceased shareholder or debenture holder as the case may be; and (d) a nominee shall be entitled to the same dividends and other advantages to which he would be entitled to, if he were the registered holder of the share or debenture except that he shall not, before being registered as a member in respect of his share or debenture, be entitled in respect of it to exercise any right conferred by membership in relation to meetings of the Company. Further, the Board may, at any time, give notice requiring any such person to elect either to be registered himself or to transfer the share or debenture, and if the notice is not complied with within ninety days, the Board may thereafter withhold payment of all dividends, bonuses or other moneys payable or rights accruing in respect of the share or debenture, until the requirements of the notice have been complied with.

Article 56 states that unless otherwise determined by the Company in General Meeting, the number of Directors shall not be less than 3 (three) and not more than such number as may be stipulated by the Companies Act, 1956, for the time being in force. Subject to the provisions of Section 255 of the Companies Act, 1956, not more than one-third of the total number of Board of Directors shall be permanent Directors. The Board shall, however, exercise its powers, subject to the provisions of the Act, the Memorandum of Association of the Company and these Articles and any regulations not inconsistent therewith and duly made thereunder by the company in General Meeting, but no regulation made by the company in General Meeting shall invalidate any prior act of the Board which would have been valid if that regulation had not been made.

Further, Article 74(ii) states that subject to the provisions of the Act, a Managing Director shall not, while he continues to hold that office, be liable to retire by rotation but he shall (subject to the provisions of any contract between him and the Company) be subject to the same provision as to resignation and removal as the other Directors of the Company and shall ipso facto and immediately cease to be a Managing Director if he ceases to hold the office of Director from any cause.

Rating Rationale

Reliance Home Finance Ltd. (RHFL)

Ratings

Facilities	Amount (Rs. crore)	Ratings ¹	Remarks
Non Convertible Debentures public issue	3,000	CARE AA+ (Double A Plus)	Assigned
Upper Tier II Bonds public issue	500	CARE AA (Double A)	Assigned
Total	3,500 (Rupees Three Thousand Five Hundred crore only)		

CARE has rated the aforesaid Upper Tier II bonds after taking into consideration their increased sensitiveness to the Capital Adequacy Ratio (CAR), capital raising ability and profitability during the long tenure of the instruments. The rating factors in the additional risk arising due to the existence of the lock-in clause in the instruments. Any delay in payment of interest/principal (as the case may be) following invocation of the lock-in-clause, would constitute as an event of default as per CARE's definition of default and as such these instruments may exhibit a somewhat sharper migration of rating compared to other debt instruments.

Rating Rationale

The ratings are based on strong parentage (Reliance Home Finance Ltd. (RHFL) is currently a wholly owned subsidiary of Reliance Capital Ltd (RCL) - rated CARE AAA), management support, access to operational systems and direct brand linkage with RCL, strategic importance of the mortgage finance business in the overall business framework of the parent. The ratings also take into account increase in scale of company's operations over past few years, recent equity infusion and expected capital support by the parent in future. The rating also factors average capitalization, profitability and asset quality parameters of RHFL. The ratings further factors RHFL's

limited seasoning of its mortgage finance portfolio. Continued parentage support, capitalization, gearing, asset quality and profitability are the key rating sensitivities.

Other Ratings

Facilities	Amount (Rs. crore)	Ratings
Long-term Debt Programme	8,000	CARE AA+ (Double A Plus)
Principal Protected Market Linked Debenture	300	CARE PP-MLD AA+ (PP-MLD Double A Plus)
Subordinated Debt	400	CARE AA+ (Double A Plus)

Key Developments –

- Going forward, management plans to list RHFL on stock exchanges by allotting 49% of its stake to existing shareholders of RCL (1 share of RHFL free of cost to be issued for every 1 share of RCL). Consequently, RHFL will not remain wholly owned subsidiary of RCL. As per the said arrangement, promoter holding of RHFL will reduce.
- On October 28, 2016, RCL infused equity capital of Rs.100 crore into RHFL. This will help the company in improving its gearing and capitalization levels. Further, RCL plans to infuse ~Rs.250 crore of equity capital by March 2017.

Background

RHFL was incorporated in June 2008 and is the wholly-owned subsidiary of Reliance Capital Ltd. (RCL). The top management team as well as the operational executive team of RHFL has been carved out of the parent resulting in strong linkages and seamless functioning of both the entities. The company primarily concentrates on housing loans to individuals. RHFL had gross loan portfolio of Rs.6791 crore and assets under management (AUM) of Rs.7,357 crore as on March 31, 2016. Out of the outstanding loan portfolio as on March 31, 2016, home loans, LAP and construction finance accounted for 62%, 12% and 20% of the portfolio, respectively. The company has also extended loans to small medium enterprises which account for 6% of

outstanding loan book as on March 31, 2016. Further, RCL plans to demerge its real estate lending portfolio into RHFL going forward.

Credit Risk Assessment

Strong parentage

RHFL is a 100% subsidiary of Reliance Capital Ltd. (RCL) rated CARE AAA. RCL is the financial services flagship company of Reliance Group. The group has business interests in various sectors like telecommunications, defence, financial services, generation and distribution of power, infrastructure, media, entertainment and health care. The rating of RHFL draws comfort from the high financial flexibility enjoyed by the company owing to it being a wholly owned subsidiary of RCL and the seamless functioning of both the entities. The rating also factors in RHFL's experienced team and operational systems which are same as the parent resulting in strong inter-linkages of both the entities.

Average Capitalization

The company is adequately capitalized with capital adequacy ratio of 16.34% (P.Y.: 15.17%) with a Tier I CAR of 10.51% (P.Y.: 11.10%) at the end of FY16. Company is expanding its loan book since FY15 which resulted in the rise of overall gearing to 11.5 times as on March 31, 2016 (March 31, 2015: 8.9 times). As on September 30, 2016, total capital adequacy ratio stood at 14.08% with Tier I CAR at 9.15%. Gearing levels stood at 12.95 times as on September 30, 2016. However, company received equity infusion of Rs.100 crore in October 2016 which is likely to improve its capitalization and gearing levels going forward.

Average profitability

In FY16, RHFL reported total income of Rs. 815 crore as against total income of Rs. 513 crore in FY15 registering a year on year growth of 59%. Growth in total income is on account of higher disbursements in FY16. The company's NIMs improved to 3.06% in FY16 (FY15: 2.71%) on account of higher portfolio yields. However, company's cost to income ratio saw deterioration in FY16 and stood at 45.34% as

CREDIT ANALYSIS & RESEARCH LTD.

against 39.05% in FY15 on account of higher operating expenses undertaken to expand operations. Overall, the company reported PAT of Rs.87 crore in FY16 as against PAT of Rs.69 crore in FY15 registering a year on year growth of 26% which is above industry average. The company reported RoTA of 1.32% in FY16 as against RoTA of 1.49% in FY15.

In H1FY17, gross loan portfolio of RHFL grew by 34% year on year and stood at Rs.7890 crore. RHFL reported PAT of Rs. 42 crore on a total income of Rs.502 crore in H1FY17 as against PAT of Rs.45 crore on a total income of Rs.383 crore in H1FY16. Reduction in profitability is on account of higher operating expenses and provisions.

Increase in scale of operations however limited seasoning of the portfolio

Size of RHFL's loan book has shown significant growth from FY15 but it still continues to be a mid size player in the housing finance segment. The assets under management (AUM) stood at Rs.7357 crore as on March 31, 2016 as compared to Rs.5771 crore as on March 31, 2015 registering a growth of 27%. Gross loans outstanding grew by 34% in FY16 to Rs.6791 crore. Company's gross loan outstanding as on September 30, 2016 stood at Rs.7890 crore registering 17% growth from Q4FY16 loan book. Due to aggressive disbursements in the past two years, the current loan portfolio of the company has limited seasoning.

Average asset quality

In FY16, RHFL's Gross NPA and Net NPA stood at 0.97% (FY15: 1.04%) and 0.74% (FY15: 0.81%) respectively. In absolute terms, gross and net NPA stood at Rs.66 crore (P.Y.: Rs.53 crore) and Rs.50 crore (P.Y.: Rs.41 crore), respectively. The Net NPA to net worth ratio stood at 8.8% as on March 31, 2016 as against 8.2% as on March 31, 2015. As on September 30, 2016, Gross and net NPA ratios stood at 1.45% and 1.15% respectively. Asset quality saw deterioration in H1FY17 on account of slippages from large ticket clients. Given the company's strong portfolio growth in FY16 and H1FY17 and the resultant low seasoning, the asset quality of new disbursements remains to be seen.

Liquidity profile

RHFL's liquidity profile as on September 30, 2016 shows negative cumulative mismatches beyond one year time bracket. This is typical for HFCs due to longer duration of assets being funded by medium term bank loans. The company's ability to refinance the borrowings on account of the high resource raising ability enjoyed by the group is expected to help it in managing its liquidity. RHFL's funding profile comprises of bank borrowings, NCDs and sub debt.

Resource Profile

RHFL's resource profile primarily comprises bank borrowings and non-convertible debentures. The proportion of outstanding bank borrowings stood at 80% (P.Y.: 71%) of total borrowings as on March 31, 2016. The NCD proportion stood at 12% (P.Y.: 13%) of total borrowings as on March 31, 2016. Short term borrowings by way of commercial paper accounted for 8% (P.Y.: 16%) of total borrowings as on March 31, 2016.

Prospects

The housing finance segment in India has emerged as one of the most secured and resilient asset classes witnessing healthy growth rates and low delinquencies. As a result, housing finance has continued to be a focus segment for both banks as well as housing finance companies registering a robust CAGR growth of roughly 19% during 2011-2016. Owing to the stress in their corporate portfolios, banks have been increasingly shifting their focus towards retail asset classes such as mortgage finance. As per CARE estimates, the size of mortgage finance market stood at over Rs.12.4 trillion as of March 2016 of which HFCs accounted for roughly 40% and banks for the remaining 60%. Although banks continue to dominate the housing finance space in India given their extensive reach and access to low cost funds which has resulted into a rise in balance transfers from HFCs to banks; HFCs continue to mark their presence with their focus, systems as well as specialization in their target segment and geographies.

During FY16, HFC's portfolio growth is estimated to be around 18-19% y-o-y. Continued healthy portfolio growth, stable margins and operating efficiencies as well as low credit costs have contributed to healthy profitability parameters of HFCs. As per performance estimates of select large players, HFCs registered net interest margin and Return on Total Assets (ROTA) of over 3.0% and 2.2%, respectively, during FY16 while GNPA ratio stood at 0.7%. One year lagged GNPA ratios continue to be stable and are estimated at 0.8%. While some of the players are witnessing rising NPA levels in their loans against property (LAP) and non- housing loans portfolio; the fact that individual housing loans (excluding LAP) account for bulk of the total mortgage finance portfolios of HFCs, the overall delinquencies are still low.

Over the last few years, many new HFCs backed by private equity players and or strong promoters with a focus on affordable housing have started operations. Recent initiatives such as lowering of risk weights for housing loans up to Rs.75 lakh (risk weight for individual housing loans of up to Rs.30 lakh and having LTVs of upto 80% has been reduced from 50% to 35%), revision in interest rates and on-lending spread caps under Rural Housing Fund by NHB in addition to Housing for All by 2022 are expected to boost credit growth in the affordable housing segment. Furthermore, initiatives such as Real Estate Act, 2016, 100% tax exemption to developers on profits from building affordable housing and services tax exemption are expected to help transparency and supply side issues.

HFCs are expected to maintain their good profitability on the basis of strong business growth and stable asset quality over the medium term. However, rising competition and the resultant possible dilution in credit underwriting norms, long-term funding and asset quality are the key challenges for the sector.

For RHFL, continued support from the parent, capitalization, profitability and asset quality are the key rating sensitivities.

outstanding loan book as on March 31, 2016. Further, RCL plans to demerge its real estate lending portfolio into RHFL going forward.

During FY16 (refers to period from April 1, 2015 to March 31, 2016), gross loan portfolio registered a year on year growth of 34%. In FY16, RHFL reported total income of Rs.815 crore as against total income of Rs.513 crore in FY15 registering a year on year growth of 59%. Growth in total income is on account of higher disbursements and better portfolio yield. Company reported PAT of Rs.87 crore in FY16 as against PAT of Rs.69 crore in FY15 registering a year on year growth of 26%. The Company's RoTA in FY16 stood at 1.32% as against RoTA of 1.49% in FY15. Rating Rationale

Brickwork Ratings has assigned the rating of BWR AA+ for the Secured NCD (Public issue) up to ₹ 3,000 Crores, BWR AA for the Unsecured Subordinated Upper Tier II NCD (Public issue) up to ₹ 500 Crores with Stable Outlook and reaffirmed the existing ratings for Reliance Home Finance Limited

Brickwork Ratings (BWR) has assigned the Ratings of BWR AA+ for the Secured NCD (Public issue) up to ₹ 3,000 Crores, BWR AA for the Unsecured Subordinated Upper Tier II NCD (**Public issue**) up to ₹ 500 Crores with Stable Outlook and reaffirmed the existing Ratings for various issues of Reliance Home Finance Limited ('RHFL' or 'the Company') as detailed in the Annexure I. Instruments with these ratings are considered to have **high degree** of safety regarding timely servicing of financial obligations. Such instruments carry very low credit risk.

BWR has relied upon the audited financial results of the Company up to FY16, unaudited financials for Q1FY17, available information and information/clarifications provided by the Company's management.

The rating has factored, *inter alia*, RHFL's strong parentage (Reliance Capital Limited-rated BWR AAA), experienced management in place, comfortable capital adequacy, Financial and Operational flexibility in terms of synergies with RCL and healthy Net Interest Margin. The rating is, however, constrained by the leveraged balance sheet, inherent risks associated with Housing Finance industry in India and the competitive landscape for HFCs.

Background

Reliance Home Finance Limited (RHFL) is a Housing Finance Company, incorporated in June, 2008 and registered with National Housing Bank. RHFL is currently a wholly owned subsidiary of Reliance Capital Limited (RCL), which is a listed company belonging to Reliance Group.

RCL has interests in asset management and mutual funds, life and general insurance, commercial finance and Home Finance, equities and commodities broking, wealth management services, distribution of financial products; asset reconstruction; proprietary investments and other activities in financial services. RHFL's mortgage

finance business is strategically important in the overall business framework of the parent company RCL.

Business Operations & Volume

RHFL's product offering includes Home Loans, Loan Against Property and Construction Finance. Asset Under Management (AUM) has increased from ₹5,771 Crores as of March 31, 2015 to ₹7,357 Crores as of March 31, 2016 which is 27% increment y-o-y, with loan disbursement of ₹3,922 Crores during FY16. The Company has also undertaken securitization of its mortgage book, and the outstanding securitized portfolio amounted to ₹566 Crores as of March 31, 2016.

Tier I CRAR was at 10.51% (11.10% as of FY15 end).

Liquidity

As of March 31, 2016, Company's borrowings aggregated ₹ 6,548 Crores. For short to medium term, the Company has a comfortable liquidity position. HFCs, in general, will have long-term mis-matches, which they need to manage appropriately. The company stipulates floating rates of interest for its loans, and hence, can pass on the varying cost of its borrowings to its customers.

Financial Performance

As per audited financial statements for FY16 of RHFL, Total Operating Income stood at ₹ 796 Crores compared to ₹ 501 Crores for FY15, a y-o-y growth of ~59%, while Net Income from Operations increased from ₹ 184 Crores to ₹ 260 Crores, a growth of ~41%. Net Interest
